

## How to use

1. Open the handle and control the water flow.
2. Move the handle left and right to control the temperature of cold and hot mixed water, left side increase of cold water and right side increase of hot water.
3. Press down the handle to shut off water flow.

## IMPORTANT NOTICE

All products must comply with regulations of Local Water Authority as contained in their by-laws.

If the product is not supplied with balanced pressure, the mixer will not function properly. Non-return valves should be fitted on both the hot and cold feeds as close to the tap as possible (non-return valves not provided).

## Maintenance & Care

To avoid damage it is necessary to consider the below guidelines.

1. To clean the mixers surface use clean hot soapy water. ONLY use soft fabric cloths.
2. DO NOT use cleaning solutions that contain hydrochloric acid, formic acid, concentrated caustic soda, chlorine or acetic acid as they can cause considerable damage.
3. DO NOT use any coarse cleaning powders or brushed to clean the mixer.
4. If there is irregular water pressure & water flow is reduced, please check if the spout is clean, if not brush the spout after vinegar soaking.

## Warranty Requirements

For full warranty terms and conditions please visit the warranty section of our website. Please pay attention to the below. Failure to do so will void your warranty:

1. Do not use acid cleansers
2. Do not use abrasive cleansers
3. Do not use abrasive cloths

## Troubleshooting

Fault: Hot is coming out when I select cold or vice versa:  
Cause: Hot and cold pipes are connected the wrong way round.

Fault: Fluctuating flow rate:  
Cause: Possible blockage in the system or operating conditions is incorrect.

Fault: Low or no flow from the valve:  
Cause: Possible blockage in the system, operating conditions are incorrect or there is a blockage in the system.

Fault: Leak from the valve:  
Cause: The holder isn't inserted to the bottom.

# Installation Guide Vienna Mono Basin Mixer VIE-312
