Product description:

A small oval wall table with a clever folding option for a tight space. The long slender oak frame and the solid oak supports hold the wooden wall table in place, creating an apparent contradiction of lightness and substantiality. The supports rest against the wall, adding to the floating expression and making it possible to sit around the table in comfort with much more leg room for everyone. The folding mechanism is well-designed and easy to operate for everyday use.

Designer's thoughts:

'With this table I sought to highlight the construction to bring out the load-bearing components. This is highlighted in the rounded edges which cast subtle shadows that lend the table an understated impression depth.' – Jonas Herman, Herman Studio
