

Medium weight cut level A6 leather reinforced sandy foam nitrile palm coated glove

The 53-7191 glove from Tilsatec is our popular 53-7121 glove but with the addition of a leather palm reinforcement over the foam nitrile coating. Delivering level A6 cut resistance to ANSI/ISEA 105, utilising lighter, finer steel for high comfort and softness the glove offers incredible protection and durability for the hardest of tasks. The sandy foam nitrile palm coating delivers good wet and dry grip whilst the cow grain leather palm provides cushioning for repetitive handling and reinforcement, extending the life of the glove.
