

Compact & precise

Unguator® BASIC

The classic Unguator BASIC

Created from the highest quality parts, the Unguator® BASIC is the perfect addition to any compounding pharmacy. Providing a convenient way to efficiently create ointments, creams, gels, and suspensions.

The Unguator® BASIC is the complete system to reliably create pharmaceutical products in batch sizes from 15ml up to 500ml. Components can be weighed mixed and dispensed in the same jar minimizing cross-contamination and waste.

The Unguator® product line also offers a patented push up bottom jar to help eliminate pockets of air created during the mixing processes and aid in dispensing of the material.

Manual mixing device:

- Performance by hand
- Quick-look coupling
- Touch Screen
- Intuitive user guidance
- Setting mixing time
- Setting of mixing speed of 10 level
- Integrated time recording of total mixing time
- ID-number generated after each mixing process
- Integrated QM functional test (IQ/OQ)
- Quiet operation due to optimized mechanical system and electronics
- Compact

Importers and Distributors of Compounding Products
