**EnVision®** cut level **A6** glove with micro foam palm coating

The EnVision glove range has been designed to provide end users with a credible, viable eco-friendly alternative to their current hand protection that doesn't mean compromising on protection, comfort or significantly higher prices.

Specifying EnVision hand protection helps to solve a major, emerging issue for businesses – how to reduce the impact of your supply chain without compromising protection for your workforce. Using EnVision gloves allows you to reduce your carbon footprint and take energy-intensive products out of your supply chain.

**Bio-based Dyneema®** is the first ever bio-based ultra-high molecular weight polyethylene fibre, reducing reliance on fossil fuel based resources. All bio-based Dyneema® fibres have the exact same characteristics and performance as conventional Dyneema®. Made from trees (a bi-product of pulp and timber) this is known as the mass balance approach, certified by ISCC (International Sustainability & Carbon Certification).

Carbon emissions reduced by **>600g** for every pair of gloves made with **Bio-Based Dyneema®**, when compared to Generic HMPE yarn.
