

Proper care and maintenance of toilets and bidets are essential for ensuring their longevity and optimal performance. Below are some key practices and tips for maintaining your toilet and bidet:

### **TOILET:**

- **Clean your toilet at least once a week. Use a mild toilet cleaner, disinfectant wipes, and a microfiber cloth or paper towels.**
- **Use toilet cleaner and brush inside the bowl only. Use a mild disinfectant, or a mixture of vinegar and hot water to clean the exterior areas of your toilet.**
- **Make sure your toilet brush is in good shape. As the bristles deteriorate they may become rough or abrasive increasing your risk of scratching or damaging your toilet.**

### **BIDET:**

- **Clean / wipe down your bidet daily. Use a soft cloth or sponge with mild soap or detergent to wipe down the surfaces of the bidet, including the bowl and exterior.**
- **Do not use a toilet bowl brush or cleaner on your bidet, this can result in damage and introduce bacteria into your bidet.**
- **Clean the bidet nozzle according to the manufacturer's instructions.**

### **AVOID:**

- **Choose cleaning products that are designed specifically for cleaning toilets and bidets.**
- **Avoid using or mixing abrasive cleaners, bleach, or other harsh chemicals that can damage your toilet and bidet's surface.**
- **Avoid using abrasive tools like steel wool or abrasive scrub pads on the toilet and bidet surfaces, as they can scratch and damage the material. Try adding baking soda while cleaning to help remove stains and hard water marks.**
