→ PUSH ←

## PUSH AHEAD

NIBCO® Push fittings, valves, and flexible connectors simply push into place for a secure connection. You can be in and out in no time at all, and push ahead to your next plumbing project.

NIBCO top-flight delivery rates ensure you'll have product available when you need it, saving you time.

### Why Use Push?

- Simply push tubing into the valve, connector or fitting until it stops for a secure connection
- Variety of valves, fittings and connectors available to join copper, PEX or CPVC-CTS tube
- No solder, crimping or joining material needed

FITTINGS, VALVES & FLEXIBLE CONNECTORS

Removal Tool

Push fittings install quickly and easily for a secure connection.

Create a simple and secure connection without any soldering, crimping or joining materials.

Lead-free\* design means environmentally-friendly drinking water connections.

FITTINGS, VALVES & FLEXIBLE CONNECTORS

#### Easy to Install

- No solder, crimping, joining material or special tools needed, just push connecting tubing into valve, connector or fitting until it stops
- Installs wet so you don't have to wait to dry out the system
- Interlocking design creates a secure connection
- Removal tool easily disconnects any joint
- Installs up to 95% faster than soldering

#### Repair & Remodeling Solutions

- Variety of valves and fittings to join copper, PEX or CPVC-CTS tube
- Lead-free\* design for safe, clean drinking water connections
- Ideal for water heater installations
- Creates secure, leak-proof connections

#### NIBCO Advantage

- Save time with NIBCO top-flight delivery rates
- Small, lightweight design makes it easier to install in tight spaces
- Made of lead-free, dezincification-resistant brass for long-lasting performance
- Fittings backed by a 25-year warranty
