

MULTI FRAME INSTALLATION:

MULTI FRAME CONNECTION POINTS:

MULTI FRAME EXTENSION KIT INSTALLATION (CAN BE USED OFF EITHER END OR EITHER SIDE):

NOTE: Designed for heavy loads without penetrating the roof. Allowable foot pressure will be subject to roof build-up, typically detailed by a structural engineer. Cross bar spacings are adjustable to accommodate various unit sizes.

Working conditions: Suitable for internal or external applications in temperatures between -40°F to 176°F.

Installation and application considerations should include health, safety and environmental needs, regulations and standards, codes of practice, climate conditions, installation location, product orientation, evaluation of the roof structure, composition, surface and condition, ancillary and complimentary products and materials. It is recommended that all rooftop products are handled and installed by suitably qualified persons. All scheme designs are based on the use of RectorSeal Big Foot Systems' products and materials only.

Frame Tech on-line Configuration & Engineering Tool

Frame Tech is an on-line tool to help you configure the precise Multi Frame parts you'll need for your equipment and environment. Frame Tech will ask the right questions and will automatically provide you with engineering specs for max wind load (tip and slip) along with the pounds per foot calculations.
