

Sentence Type Foldtivity

Includes step-by-step instructions and components for students to create their own Simple, Compound, and Complex Sentence Foldtivity!

Grades 4-6

Sentence Type *foldtivity*

Teacher Directions

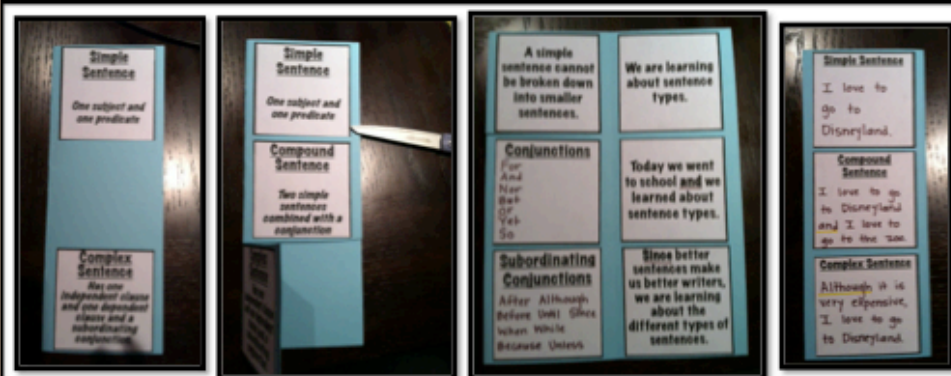

Supplies

- Colored cardstock or construction paper
- Glue Sticks
- Copies of pages 3-5 for each student
- Colored markers
- Scissors

Directions

- Start with an 8.5 x 11 piece of paper, preferably colored.
- Have students cut out the squares on pages 2-4, following directions for the blank squares.
- Fold the paper in half, hot dog style.
- Holding the paper portrait style (like a book with the fold on the left), paste the "Simple Sentence: One subject and one predicate" square at the top of the page. Paste the "Complex Sentence: Has one independent clause and one dependent clause and a subordinating conjunction" square at the bottom of the page.
- Cut a slit (from the opening to the fold) under the top square, and once again above the bottom square.
- Paste the "Compound Sentence: Two simple sentences combined with a conjunction" square in between.
- Open the front three flaps. On the left of the foldtivity, glue one square in each flap. Glue in the following order: "A simple sentence cannot be broken down...", "Conjunctions (written)," and "Subordinating Conjunctions (written)."
- To the right of each sentence square, place the appropriate example sentence (see pic).
- On the back of the foldtivity, have students paste their created sentences. Glue them in the same order as the other sides: simple sentence on top, compound sentence in the middle, and the complex sentence on the bottom.
