LEVEL H – Set #2

10 passages with
comprehension questions!

Great resource for small
group, whole group, and
independent work!

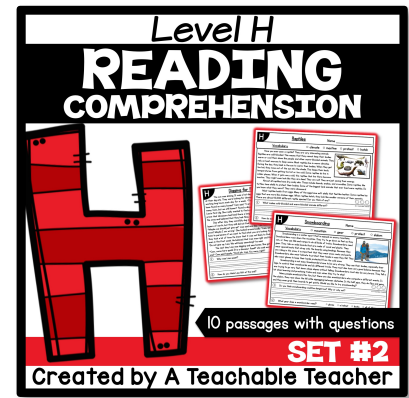

Printable AND Digital
version for each passage!

NO PREP!

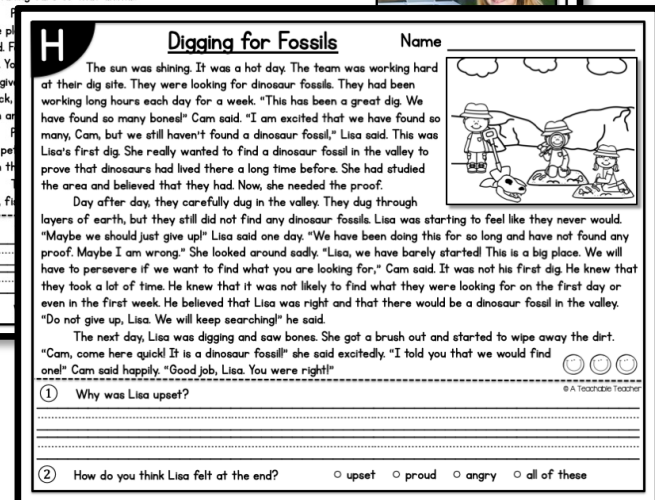

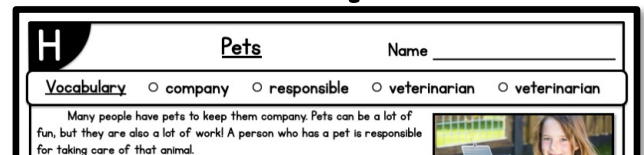

Each Passage Includes:

- ✓ **Complexity** - uses sight words and different phonics skills to create an engaging passage that holds students' interest
- ✓ **Fluency** - three happy faces for students to color each time they read
- ✓ **Comprehension** - multiple choice and open ended questions to allow students to refer back to the text for the answers.
- ✓ **Student-friendly graphics** - appropriate graphics (clip art and real world pictures)

Reading Skills Covered:

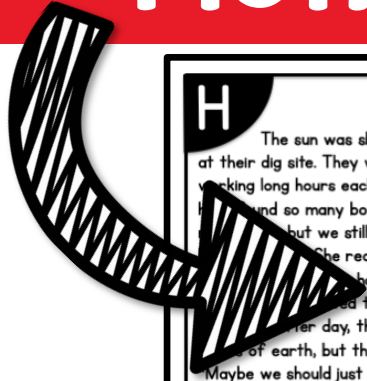

- ✓ fiction/nonfiction
- ✓ build fluency
- ✓ reading comprehension

Fiction Passages

H Digging for Fossils Name _____

The sun was shining. It was a hot day. The team was working hard at their dig site. They were looking for dinosaur fossils. They had been working long hours each day for a week. "This has been a great dig. We found so many bones!" Cam said. "I am excited that we have found so many bones, but we still haven't found a dinosaur fossil," Lisa said. This was the first time she really wanted to find a dinosaur fossil in the valley to prove that she had lived there a long time before. She had studied about dinosaurs and had found that they had. Now, she needed the proof. The next day, they carefully dug in the valley. They dug through layers of earth, but they still did not find any dinosaur fossils. Lisa was starting to feel like they never would. "Maybe we should just give up!" Lisa said one day. "We have been doing this for so long and have not found any proof. Maybe I am wrong." She looked around sadly. "Lisa, we have barely started! This is a big place. We will have to persevere if we want to find what you are looking for," Cam said. It was not his first dig. He knew that they took a lot of time. He knew that it was not likely to find what they were looking for on the first day or even in the first week. He believed that Lisa was right and that there would be a dinosaur fossil in the valley. "Do not give up, Lisa. We will keep searching!" he said.

The next day, Lisa was digging and saw bones. She got a brush out and started to wipe away the dirt. "Cam, come here quick! It is a dinosaur fossil!" she said excitedly. "I told you that we would find one!" Cam said happily. "Good job, Lisa. You were right!"

2 How do you think Lisa felt at the end? upset proud angry all of these

Nonfiction Passages

H Reptiles Name _____

Vocabulary climate inactive protect hatch

Have you ever seen a reptile? They are very interesting animals. Reptiles are cold-blooded. This means that they cannot keep their bodies warm or cool them down like people and other warm-blooded animals. They rely on heat sources to keep warm. Most reptiles live in warm climates. During the day, they bask in the sun to warm their bodies. When they get too hot, they move out of the sun into the shade. This keeps their body temperatures from getting too hot or too cold. Some reptiles do live in colder places. When it gets very cold, the reptiles that live there become inactive. They might even look like they are dead. They are not! They are just saving their energy.

Almost all reptiles have dry, scaly skin. These include lizards, snakes, and crocodiles. Some reptiles, like turtles, have shells to protect their bodies. Some of the biggest land animals that ever lived were reptiles. Do you know what they were? They were dinosaurs!

Most reptiles hatch from eggs. Many of the eggs have soft shells that feel like leather. Some reptiles lay eggs that are more like chicken eggs. When reptiles hatch, they look like smaller versions of their parents. There are almost 10,000 different reptile species! Can you think of any?

H Pets Name _____

Vocabulary company responsible veterinarian veterinarian

Many people have pets to keep them company. Pets can be a lot of fun, but they are also a lot of work! A person who has a pet is responsible for taking care of that animal.

Pet owners have to make sure that their pets are healthy. Pets need safe places to live and sleep. They also need water, and the right kind of food. For example, you cannot feed chocolate to a dog. That will make it sick. You have to get dog food for a dog. It is also important that you do not give a pet too many treats. That could make your pet sick. If your pet is sick, it is important to take it to the veterinarian. The veterinarian can help figure out what is wrong with an animal and help it get better.

Pet owners also need to make sure that their pets are happy. It is a pet owner's job to learn what his or her pet likes and does not like. It is important that the pet gets exercise. Many pets get exercise by playing with their owners. Some pets just need space to run or swim to get exercise.

There are many different animals that can be pets. Each kind is different. Whether you choose a cat, dog, fish, horse, or hamster, it is important to remember that having a pet is a big responsibility!

What are two ways a pet owner has to take care of his or her pet?

What do pets need? treats food toys
