HOW TO EDIT

Fonts

If you want your fonts to match mine, you will need them on your computer. All the fonts I use are free for your personal use. You can click [here](#) to download them from Kimberly Geswein on TPT. To make editing easier, download and install these fonts before you open the "EDIT AND PRINT"

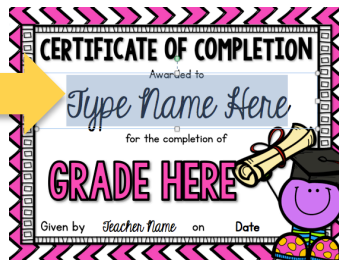

PowerPoint (.PPTX) file. On this document, I have used the following fonts:

- KG Eyes Wide Open - Click [here](#) to download from TPT
- KG Let Her Go Solid - Click [here](#) to download from TPT
- KG Primary Penmanship- Click [here](#) to download from TPT

PowerPoint

Use PowerPoint to open the file. Choose the certificate you want to edit. When you click on the following phrases, you will be able to edit the text.

- Student name
- Grade
- Teacher name
- Date

If you have already downloaded the fonts, the sizing will be the same. If you choose to use your own fonts, you may have to adjust the size of the text to fit on the certificate in an appealing manner.

Note: You will not be able to remove or change the other text or graphics. These items are locked per artist's terms of use.
