# EASY

For an easier center, do not incorporate the “bananas.” The bananas have words that match the pictures. This center is great for students who are practicing phonemic awareness and still have not mastered letter-sound correspondence.

# HARD

Incorporate the “bananas” to challenge students who can read. Words/pictures range from simple CVC words to words with long vowels.

\*Note: Most rhyming pairs include only two rhyming words, this one happens to include four.
