

More Control. Less Worry.

# — THE WORRY-FREE — PUMP WARRANTY

With our SL, SE and S pumps, Grundfos offers robust submersible wastewater pumps featuring unmatched reliability and efficiency, so you can enjoy trouble-free operation. Every Grundfos submersible wastewater pump comes with a 24-month warranty.\* Now, extend your peace of mind by adding a combination of Grundfos controls and monitoring solutions to your purchase.

### Three-Year Extended Warranty

Extend the Grundfos worry-free guarantee with a free Three-Year Extended Warranty when you purchase an SL, SE or S pump and add the following controls:

#### Grundfos Dedicated Controls with a CU362 controller and

- MP204 or
- CUE

### Five-Year Prorated Warranty

Extend your peace of mind with a free Five-Year Prorated Limited Warranty when you purchase an SL, SE or S pump and enhance your controls:

#### Meet the Three-Year Extended Warranty requirements, plus purchase:

- GRM (Grundfos Remote Management) or
- Startup by a Grundfos authorized personnel or Grundfos Authorized Service Provider (ASP)

*Commissioning information and startup document must be on file for the pump to qualify. All pump applications and industry are eligible.*

*\*Standard warranty is for 24-months from installation or 30 months from the date of purchase, whichever occurs first.*

**CU362:**

With the CU362, you can control and monitor up to six Grundfos wastewater pumps from a user-friendly display.

Advanced features allow for system measurement and calculation. The CU362 integrates seamlessly with SCADA systems and other monitoring and control equipment.

**MP204:**

Made especially for pumps by pump specialists, the MP 204 motor protection unit offers pump protection that is as simple to use as it is efficient.

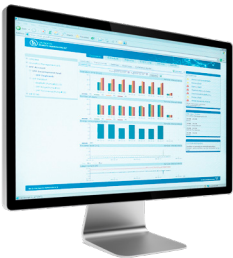

The MP 204 protects against power supply issues, such as undervoltage, overvoltage, and other variations in power supply. So even if your external power supply is not steady, your pump will remain as reliable as ever.

**CUE:**

With a CUE frequency converter, you can control the speed of virtually any Grundfos pump, irrespective of size, power range, and application area.

A series of predefined control modes, such as constant pressure, proportional pressure, constant level or constant flow, makes it easy to set up a system in only a few steps.

**Grundfos GRM:**

GRM, a web-based remote monitoring, management and reporting platform for pump installations, gives you full control of your system from a PC or smartphone.

The user-friendly interface allows live monitoring, analysis and adjustments to optimize energy consumption and system performance – all from the comfort of your office.
