English (GB) Safety instructions

Original safety instructions

These safety instructions give a quick overview of the safety precautions to be taken in connection with any work on this product. Observe these safety instructions during handling, installation, operation, maintenance, service and repair of this product. These safety instructions are a supplementary document, and all safety instructions will appear again in the relevant sections of the installation and operating instructions. Keep these safety instructions at the installation site for future reference.

Qualification and training of personnel

The personnel responsible for the installation, operation and service must be appropriately qualified for these tasks.

Safety instructions for the operator/user

Before starting work on the pump, the pump must be disconnected from the power supply. The system must be pressureless!

Caution

Safety of the system in the event of a failure in the dosing pump

WARNING

Chemical hazard

Death or serious personal injury

- Make sure that any chemicals that are released from the pump or any damaged lines do not cause damage to system parts and buildings.
- The installation of leak monitoring solutions and drip trays is recommended.

Dosing chemicals

Warning

Before switching the supply voltage back on, the dosing lines must be connected in such a way that any chemicals in the dosing head cannot spray out and put people at risk.

The dosing medium is pressurised and can be harmful to health and the environment.

Observe the chemical manufacturer's safety data sheets and safety instructions when handling chemicals!

Caution

A deaeration hose, which is routed into a container, e.g. a drip tray, must be connected to the deaeration valve.

Caution

Ensure that parts in contact with the dosing medium are resistant to the dosing medium under operating conditions, see data booklet!

Diaphragm breakage safety measures

If the diaphragm leaks or is broken, dosing liquid escapes from the drain opening on the dosing head (see Dosing head overview).

Warning

Danger of explosion, if dosing liquid has entered the pump housing!

Operation with damaged diaphragm can lead to dosing liquid entering the pump housing.

In case of diaphragm breakage, immediately separate the pump from the power supply!

Make sure the pump cannot be put back into operation by accident!

Dismantle the dosing head without connecting the pump to the power supply and make sure no dosing liquid has entered the pump housing. Proceed as described in section Dismantling in case of diaphragm breakage.

Applications

The pump is suitable for liquid, non-abrasive, non-flammable and non-combustible media strictly in accordance with the instructions in these installation and operating instructions.

- Permissible ambient temperature: 0 to +45 °C
- Permissible temperature of the dosing medium: -10 to +45 °C

Caution

The dosing medium must be in liquid aggregate state!

Observe the freezing and boiling points of the dosing medium!

Improper operating methods

Warning

The pump is NOT approved for operation in potentially explosive areas!

Do not dose flammable liquids!

Do not use improper hoses and pipes!
Do not use improper hydraulic connections!

Caution Do not use a wrong supply voltage!
Do not use a wrong electrical connection!
Do not use a direct electrical connection without mains plug!

Pump assembly

Warning
Install the pump in such a way that the plug can easily be reached by the operator during operation! This will enable the operator to separate the pump from the mains quickly in case of emergency!

Hydraulic connection

Warning
Wear protective clothing (gloves and goggles) when working on the dosing head, connections or lines!

The dosing head may contain water from the factory check!

Caution When dosing media which should not come into contact with water, another medium must be dosed beforehand!

Caution Tighten the dosing head screws with a torque wrench once before commissioning and again after 2-5 operating hours at 4 Nm.

Note Pressure differential between suction and discharge side must be at least 1 bar/14.5 psi!

Electrical connection

Mains connection

Warning
The enclosure class (IP65/Nema 4X) is only guaranteed if plugs or protective caps are correctly installed!

Warning
The pump can start automatically when the mains voltage is switched on!
Do not manipulate mains plug or cable!

Note The mains plug is the separator separating the pump from the mains.

Signal connections

Applies to DDE-PR/P control variant.

Warning
Electric circuits of external devices connected to the pump inputs must be separated from dangerous voltage by means of double or reinforced insulation!

Pressure monitoring

Warning
Install a pressure-relief valve in the pressure line to provide protection against impermissibly high pressure!

Inputs/outputs

Applies to DDE-PR/P control variant.

Empty and low-level signals

Caution When the tank is filled up again, the pump restarts automatically!

Dismantling the diaphragm and valves

Warning
Danger of explosion, if dosing liquid has entered the pump housing!
If the diaphragm is possibly damaged, don't connect the pump to the power supply! Proceed as described in section Diaphragm breakage safety measures!
Dismantle the dosing head without connecting the pump to the power supply and make sure no dosing liquid has entered the pump housing. Check daily whether liquid is escaping from the drain opening!

Maintenance work must only be carried out by qualified staff.
Warning
Wear protective clothing (gloves and goggles) when working on the dosing head, connections or lines!
Do not allow any chemicals to leak from the pump. Collect and dispose of all chemicals correctly!

Caution Before any work to the pump, the pump must be disconnected from the power supply. The system must be pressureless!

Repairs

Warning

The pump housing must only be opened by personnel authorised by Grundfos!

Repairs must only be carried out by authorised and qualified personnel!

Switch off the pump and disconnect it from the voltage supply before carrying out maintenance work and repairs!

After consulting Grundfos, please send the pump, together with the safety declaration completed by a specialist, to Grundfos. The safety declaration can be found at the end of these instructions. It must be copied, completed and attached to the pump.

Disposing of the product

This product or parts of it must be disposed of in an environmentally sound way.

1. Use the public or private waste collection service.
2. If this is not possible, contact the nearest Grundfos company or service workshop.

The crossed-out wheellie bin symbol on a product means that it must be disposed of separately from household waste. When a product marked with this symbol reaches its end of life, take it to a collection point designated by the local waste disposal authorities. The separate collection and recycling of such products will help protect the environment and human health.

See also end-of-life information at www.grundfos.com/product-recycling.
