Product description:

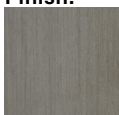

Functional Steel Shelf with Subtle Detail. This delicate steel shelf unit which is made for small living. The angled brackets at the back provide stability while preserving the open, airy design.

Each shelf features a gently rounded front that emphasises the craftsmanship of the individual elements and lends the raw steel profiles a smooth, tactile finish. Thanks to its generous depth, this functional unit can be used as elegant multipurpose shelving, either on its own or combined with others. Crafted from brushed stainless steel.

Designer's thoughts:

'The design of the steel shelf unit began with the bent corners, which were intended both to frame the shelves, like a closed case, and act as the structure of the unit. The bent edges of the individual components soften the visual appearance of the hard steel and make it possible to minimize the thickness of the elements.' - Jonas Herman, Herman Studio
