## 1. General data

### Performance range

### Notes:

#### Grundfos Canada

Pumps supplied by Grundfos Canada are normally supplied with motors from other manufacturers. 575V motors meet EPAct/NRC efficiency standards. Dimensions and data will vary slightly. Contact local Grundfos company for more information.

## Product data

### Introduction

This product guide deals with SPK, SPKE, CRK, CRKE pumps.

**Fig. 1** SPK and CRK pumps

SPK, CRK pumps are vertical multistage centrifugal pumps designed for pumping of cooling lubricants for machine tools, condensate transfer and similar applications.

The pumps are designed to be mounted on top of tanks with the chamber stack immersed in the pumped liquid.

SPK and CRK pumps come in various pump sizes and have various numbers of stages to provide the flow, the pressure and the installation length required.

The pumps consist of two main components: The motor and the pump unit. The motor is a heavy duty Grundfos specified motor.

The pump unit consists of optimized hydraulics, various types of connections, a motor stool, a given number of chambers and various other parts.

### SPKE and CRKE- pumps with built-in variable frequency drive

**Fig. 2** SPKE and CRKE pumps

SPKE and CRKE pumps are built on the basis of standard pumps.

The difference between the standard pumps and the SPKE and CRKE pump ranges is the motor. SPKE and CRKE pumps are fitted with an E-motor, i.e. a motor with built-in frequency control.

The motors of the SPKE and CRKE pumps are Grundfos MLE motors.

Frequency control enables continuously variable control of motor speed, which makes it possible to set the pump to operate in any duty point. Continuously variable control of the motor speed enables adjustment of the performance to a given requirement.

The pump materials are the same as those of the SPK and CRK pump ranges

### Machine tool applications

Grundfos' range of high-pressure pumps offers unsurpassed accuracy and stability to make sure that nothing interferes with the delicate machining process. Equally important, high efficiency ensures a remarkably low heat input into the cooling lubricant. Integrated variable frequency drives can be optionally supplied for increased system efficiency and flexibility. Pumps suitable for machine tool applications are the immersible SPK and CRK offering a tank mounted design.

### Machine tool sub applications

#### Boring

Grundfos is capable of providing the exact pressure and flow required for different materials, bore diameters and tool speeds in both through boring and blind boring. Our flexible range includes pumps supplying a pressure of up to 345 PSI.

#### Milling/turning

The Grundfos range easily meets the individual cooling requirements of different materials in milling and turning – from low flow and low pressure to high flow and high pressure. The pumps are available in different lengths and customized to fit specific tank sizes. In fact, the modular construction of our pumps allows for more than 1,000,000 individual configurable variants.

#### Wire cutting

In wire cutting it is essential that the media are clean. This results in a more accurate process and extends the life of the filter. As a steady temperature is required for wire cutting operation, the process will benefit from a Grundfos E-solution.

### Part washing

The Grundfos range includes pumps suitable for corrosive media and media with a high content of particles. Our variable frequency drive operated pumps with high-efficiency motors ensure that systems operate under the best possible conditions with low-energy consumption. Pumps suitable for this application are all immersible pumps.

#### Chilling

The reliable and thoroughly-tested range of pumps for chillers offers a particularly diverse application spectrum. It covers cooling water circuits, washing plants, industrial circulation systems as well as general pressure boosting applications. All pumps are available with an E-motor to increase efficiency and perfectly control any process. Pumps suitable for this application are all immersible pumps.

#### Condensate systems

As condensate is normally pumped from a tank, an immersible pump will be a perfect choice. Compact solution as half the pump will be in the tank. Optimum suction as no pipes or valves are needed in front of inlet. For temperatures above 194°F, a 248°F version is available.

#### Wash & clean

As for condensate systems, wash and clean applications are typically based around a tank. So also here the immersible pumps can save space and secure optimum suction. A version in all stainless steel is available for aggressive media.

## I-version

As standard the SPK/CRK pumps are available as I-version called **SPKI/CRKI**. All parts of SPKI/CRKI pumps in contact with the pumped liquid are made of stainless steel AISI 304 or AISI 316.

## Extension pipe

All SPK pumps are available with an extension pipe. The extension pipe is available in various lengths enabling installation lengths up to 39.63 in. (1005 mm).

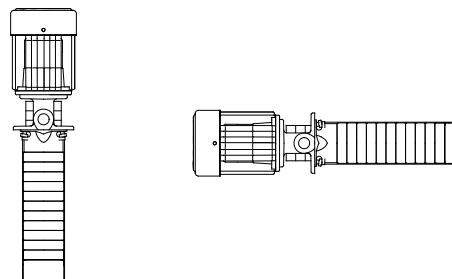

CRK 2 and CRK 4 pumps can be extended by means of empty chambers enabling installation lengths up to 39.63 in. (1005 mm).

## Installation

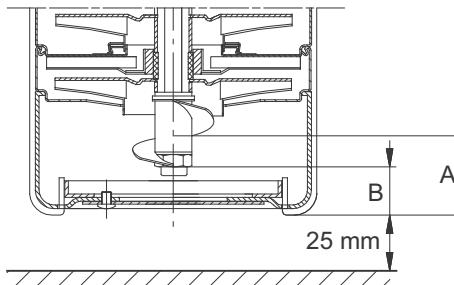

### SPK, CRK 2/4

**Fig. 4** SPK, CRK 2/4

## Motor

### Grundfos standard motors - ML and Baldor® motors

SPK and CRK pumps are fitted with a Grundfos specified motor. The motors are all heavy-duty 2-pole, NEMA C-face motors.

### Variable frequency drive motors - MLE motors

SPKE and CRKE pumps are fitted with a totally enclosed, fan-cooled, 2-pole motor with integrated variable frequency drive.

From 0.5 Hp to 1.5 Hp Grundfos offers SPKE and CRKE pumps fitted with single-phase MLE motors (1 x 208-230 V). From 1.0 Hp to 30 Hp Grundfos offers the

SPKE and CRKE pumps fitted with three-phase MLE motors (3 x 460-480 V). From 1.5 Hp to 7.5 Hp Grundfos offers the SPKE and CRKE pumps fitted with three-phase MLE motors (3 x 208-230 V).

#### Approvals

\* 1 - 10 Hp ML motors are premium efficiency as standard

### Operating conditions

Liquid temperature: +14 °F to +194 °F (-10 °C to +90 °C).

#### Motor protection

Single-phase Grundfos specified motors up to 7.5 hp have a built-in thermal overload switch.

Three-phase motors **must** be connected to a motor starter in accordance with local regulations.

### Sound pressure level

Motor [hp]	dB(A)
0.33 to 1.5	<70
2.0 to 5.0	71
7.5	78
10.0	78
15.0	84
20.0	77

### Optional motors

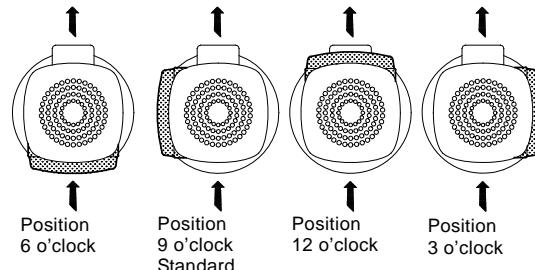

The Grundfos standard range of motors covers a wide variety of application demands. However, for special applications or operating conditions, custom-built motor solutions can be provided.

For special applications or operating conditions, Grundfos offers custom-built motors such as:

- explosion proof motors,
- motors with anti-condensation heating unit,
- low-noise motors,
- premium efficiency motors,

### Terminal box positions

As standard SPK and CRK pumps built in North America have their terminal box mounted in position 9 o'clock of the pump; however other positions are possible.

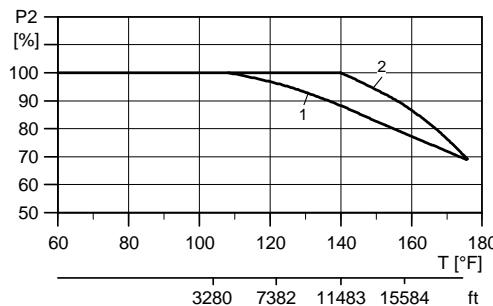

TM02 7777 4003

### Ambient temperature

Ambient temperature: Maximum +104 °F.

If the ambient temperature exceeds +104 °F or if the motor is located 3280 feet above sea level or higher, the motor output (P<sub>2</sub>) must be reduced due to the low cooling effect of the air. In such cases, it may be necessary to use a motor with a higher output.

Overheating may result from excessive ambient temperatures or the low density and consequently low cooling effect of the air at high altitudes. In such cases, it may be necessary to use a motor with a higher rated output (P<sub>2</sub>).

**Fig. 6** Relationship between motor output (P<sub>2</sub>) and ambient temperature/altitude

## 8. Accessories

### Sensors for SPKE and CRKE

The sensors must be fitted to the pipework with suitable fittings.

DPI differential-pressure sensor kit	Pressure range		Product number
Kit includes:	[psi]	[bar]	
• 1 sensor incl. 3 ft (0.9 m) screened cable (7/16" connections)	0 - 9	0 - 0.6	96611522
• 1 original DPI bracket (for wall mounting)	0 - 14.5	0 - 1.0	96611523
• 1 Grundfos bracket (for mounting on motor)	0 - 23	0 - 1.6	96611524
• 2 M4 screws for mounting of sensor on bracket	0 - 36	0 - 2.5	96611525
• 1 M6 screw (self-cutting) for mounting on MGE 90/100	0 - 58	0 - 4.0	96611526
• 1 M8 screw (self-cutting) for mounting on MGE 112/132	0 - 87	0 - 6.0	96611527
• 3 capillary tubes (short/long)	0 - 145	0 - 10	96611550
• 2 fittings (1/4" - 7/16")			
• 5 cable clips (black)			
• Installation and operating instructions (480675)			
• Service kit instructions

### R100 remote control

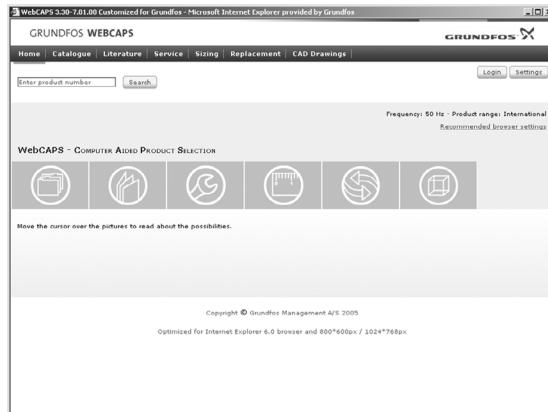

Fig. 11 R100 remote control

Use the R100 for wireless communication with the SPKE and CRKE pumps. The communication takes place by means of infrared light.

## 9. Further product documentation

### WebCAPS

WebCAPS is a **Web-based Computer Aided Product Selection** program available on [www.grundfos.com](http://www.grundfos.com).

WebCAPS contains detailed information on more than 185,000 Grundfos products in more than 20 languages.

In WebCAPS, all information is divided into 6 sections:

- Catalog
- Literature
- Service
- Sizing
- Replacement
- CAD drawings.

This screenshot shows the 'Catalog' section of WebCAPS. It displays a search results table for 'CR 10' pumps. The columns include Product No., Product name, Phase, U, Frequency, Pump type, and Pump series. The table lists several entries for CR 10-1, CR 10-2, and CR 10-3 models with various pump characteristics like voltage and shaft seal types.

#### Catalog

This section is based on fields of application and pump types, and contains

- technical data
- curves (QH, Eta, P1, P2, etc) which can be adapted to the density and viscosity of the pumped liquid and show the number of pumps in operation
- product photos
- dimensional drawings
- wiring diagrams
- quotation texts, etc.

This screenshot shows the 'Literature' section of WebCAPS. It displays a search results table for 'CR' pumps. The columns include Title, Type, and Language. The table lists various documents such as 'A Wide Range of Vertical Pumps', 'ATEX Approved CR Pump', 'CR 1... 30 acoustical low (pump list)', 'CR 1... 3, 5, 7, 9, 11, 13, 15, 17, 19, 21, 23, 25, 27, ### Sizing

This section is based on different fields of application and installation examples, and gives easy step-by-step instructions in how to

- select the most suitable and efficient pump for your installation
- carry out advanced calculations based on energy consumption, payback periods, load profiles, life cycle costs, etc.
- analyse your selected pump via the built-in life cycle cost tool
- determine the flow velocity in wastewater applications, etc.

### Replacement

In this section you find a guide to selecting and comparing replacement data of an installed pump in order to replace the pump with a more efficient Grundfos pump. The section contains replacement data of a wide range of pumps produced by other manufacturers than Grundfos.

Based on an easy step-by-step guide, you can compare Grundfos pumps with the one you have installed on your site. When you have specified the installed pump, the guide will suggest a number of Grundfos pumps which can improve both comfort and efficiency.

### CAD drawings

In this section it is possible to download 2-dimensional (2D) and 3-dimensional (3D) CAD drawings of most Grundfos pumps.

These formats are available in WebCAPS:

#### 2-dimensional drawings:

- .dxf, wireframe drawings
- .dwg, wireframe drawings

#### 3-dimensional drawings:

- .dwg, wireframe drawings (without surfaces)
- .stl, solid drawings (with surfaces)
- .eppt, E-drawings.

WinCAPS is a **Windows-based Computer Aided Product Selection** program containing detailed information on more than 185,000 Grundfos products in more than 20 languages.

The program contains the same features and functions as WebCAPS, but is an ideal solution if no Internet connection is available.

WinCAPS is available on CD-ROM and updated once a year.

## 11. Quotation text

### SPK, CRK

Horizontal, non-self-priming, multistage, end suction, centrifugal pump for installation in pipe systems and mounting on a foundation.

The pump has the following characteristics:

- impellers and intermediate chambers are made of AISI \_\_\_\_\_ stainless steel
- pump head and volute are made of \_\_\_\_\_
- power transmission is via cast iron split coupling.
- pipework connection is via \_\_\_\_\_

The motor is a \_\_\_\_\_ -phase AC motor.

### Technical

Rated flow: \_\_\_\_\_ gpm

Rated head: \_\_\_\_\_ ft

Minimum liquid temperature: \_\_\_\_\_ °F

Maximum liquid temperature: \_\_\_\_\_ °F

Type of shaft seal: \_\_\_\_\_

### Materials

Material, pump housing: \_\_\_\_\_
