NIB-SEAL® Locking Handle

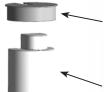

Insulate Extend Lock it!

The patented technology of the 3-in-1 NIB-SEAL locking handle solves three problems at once: it extends, it insulates, and it locks. The innovative locking handle design extends valve actuation to provide ample room for insulating around piping systems, and its unique thermal barrier system prevents heat transfer and condensate development. The NIB-SEAL locking handle also allows the valve to be locked in the full open or closed position to prevent incidental actuation.

Designed for new installations, the NIB-SEAL locking handle is engineered to work with NIBCO® bronze ball valves.**

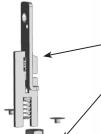

LOCKING DEVICE works with padlock* or cable lock*

CAP keeps moisture-laden air out to reduce chance of condensate formation

LOCKING MECHANISM

EXTENSION HANDLE of durable non-thermal conductive CPVC prevents formation of condensation

PREFORMED HOLE for identification tag

PROTECTIVE SLEEVE allows operation of valve handle and maintenance of valve packing while maintaining integrity of piping insulation

NIBCO BALL VALVE

NIB-SEAL® Locking Handle

U.S. PATENT 9,810,344

Applications: For piping systems requiring up to 2" of insulation, specify a nonconductive CPVC extended-locking handle bronze ball valve tested to UL 2043, and UL listed for installation in air handling spaces. The assembly offers a vapor seal, position indicators, locking device, and actuation without disturbing the insulation. Designed for new installations, the NIB-SEAL locking handle installed on bronze ball valves offers a wide range of advantages for typical commercial HVAC systems as well as industrial applications where insulated piping with a locking device is desirable. Specify NIB-SEAL insulated locking handle.

Approvals: UL 2043

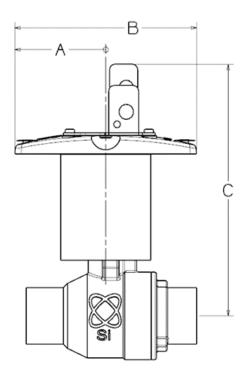

Safety Lock Compatibility: Cable lock as small as $\frac{1}{8}$ " diameter to padlock as big as 0.33" diameter shackle.

Temperature Range: 15° F to 250° F

Not intended for steam applications in excess of 15 PSI.
