

568 Thermostat

The 568 thermostat is compatible with today's modern hydronic heating systems. This battery operated thermostat has digital displays that will show room temperature or set temperature when adjusted. With simple installation and function, it's the ideal choice for buildings with a multi zone heating system.

Submittal Data Information 568-22 Thermostat

Submittal Data #101-127
Supersedes: New

Effective: 12/17/15

Features

- Battery Operated and Included
- Uniform Equipment Compatible with Dry Contact Switching (Normally Open & Normally Closed)
- LCD Digital Temperature Display shows Current or Set Temperature
- Simple Installation and Functionality
- Icons for Heating Call & Low Battery

Specifications

Electrical Data

Power Supply.....3 VDC, 2 @ AAA Batteries
Switch Rating.....24 VAC 1.0 Amps
Switch Action.....Relay Action (*Dry Contacts*)

Thermal Data

Temp. Range.....40°F to 95°F
Operating Temp.....-32°F to 104°F
Storage Temp.....-32°F to 122°F
Operating Humidity Range: 0 to 90% *noncondensing*

Application

The Taco 568-22 is an extremely versatile digital thermostat. It is battery operated, with dry contact switching and is compatible with most types of hot water heating systems. It can operate conventional heating systems that require a contact closure when room temperature is below set temperature. It can also operate some failsafe systems that require a contact closure when room temperature is above set temperature.

*For example:
Nursing homes and daycare centers that use normally open zone valves.*
