

Pleat Mirror

“I wanted a mirror that behaves like architecture—a single sheet of mirror-polished steel, pleated so the reflection gently wraps around the form. Those subtle distortions animate the room, turning a functional surface into a living sculpture. For me, it’s less about perfect likeness and more about presence—the way light and movement gather in the fold.”

— Gustav Winsth

Designed by	Gustav Winsth
About the Designer	Gustav Winsth runs his Stockholm-based studio with a curious eye on process. With a background in mechanical engineering, his work often begins with method — exploring how manufacturing techniques and materials can inform form. The result is a design language that feels equal parts industrial and expressive. Always looking for new ways to shape and connect, Winsth brings a technical elegance to objects that invite both use and inspection.
Environment	Indoor
Country of Production	Denmark
Description	The Pleat Mirror reimagines a full-length mirror as a sculptural, architectural element. Crafted from mirror-polished stainless steel, it reflects its surroundings with a bold, contemporary expression, while its folded form adds depth and visual interest. The reflective surface shifts with the room and light, behaving almost like a living artwork. Cut from a single steel sheet to precise proportions, its scale echoes a doorway, lending it presence in both residential and commercial spaces. Combining industrial materiality with soft, fluid curves, Pleat feels minimal yet commanding.
Material	Mirror-finish 84% recycled stainless steel.
Cleaning & Care	Mirror-finish stainless steel has a highly polished surface that is more vulnerable to scratches than brushed or matte finishes. Even fine particles of dust or grit can leave marks if rubbed against the surface. To preserve the mirror finish and prevent scratches, handle the product with care, avoid contact with hard or sharp objects, and never drag items across the surface. For routine cleaning, use a soft, dry microfiber cloth to remove fingerprints and water marks. Always remove dust before cleaning to prevent surface scratches. For stubborn stains, use a chloride-free glass cleaner on a clean, soft, nonabrasive cloth or sponge, and gently wipe the surface. Buff out any streaks with a clean, dry microfiber cloth. Avoid steel wool and abrasive brushes, which can scratch and dull the finish or leave rust-prone residue. According to ECDC guidelines, the surface can tolerate regular disinfection with solutions containing at least 70% ethanol. The mirror is suitable for wet rooms.

Pleat Mirror

Dimensions

Height: 226,7 cm / 89.25"
Width: 57 cm / 22.44"
Depth: 20,9 cm / 8.23"
