

FRITZ HANSEN

PK111™

PRODUCT FACT SHEET

PK111™

The PK111™ reintroduces Poul Kjærholm's sculptural six-panel room divider — an elegant study in proportion, material and form. Crafted in laminated Oregon pine with beech inner layers, its self-supporting structure can be freely arranged to shape or divide a space. Originally designed for Kjærholm's own home, the 140 cm high screen creates an intimate alcove when seated while maintaining a sense of openness when standing. A refined example of Fritz Hansen's expertise in laminated wood, PK111™ extends the Poul Kjærholm collection with a warm, architectural expression.

DESIGNER / YEAR OF DESIGN

Poul Kjærholm, 1956

ABOUT THE DESIGNER

Poul Kjærholm was a trained cabinet maker and continued his studies at the Danish School of Arts and Crafts in Copenhagen. He had a particular interest in different construction materials, especially steel, which he considered a natural material with the same artistic fineness as other natural materials.

Poul Kjærholm was first employed at Fritz Hansen for about a year, where he designed a number of noteworthy chair prototypes. In 1955, Poul Kjærholm initiated his collaboration with manufacturer Ejvind Kold Christensen, which lasted until Kjærholm's death in 1980. In 1982, Fritz Hansen took over the manufacture and sales of "The Kjærholm Collection", which was developed over the period 1951 to 1967.

MODELS

PK111

MATERIAL

The room divider is made of pressure moulded veneer – 5 layers of inner veneer and 2 layers of outer veneer. The inner veneer is Beech, and the outer veneer is Oregon Pine. The surface is treated with a clear lacquer finish.

MATERIALS IN %:

Plywood: 100%

FEATURES

- Extendable

SURFACES

The room divider is available in 1 variant:

CLEAR LACQUERED VENEER - OREGON PINE
