HEART WORDS FLASH CARDS

High frequency word practice that aligns to the Science of Reading!

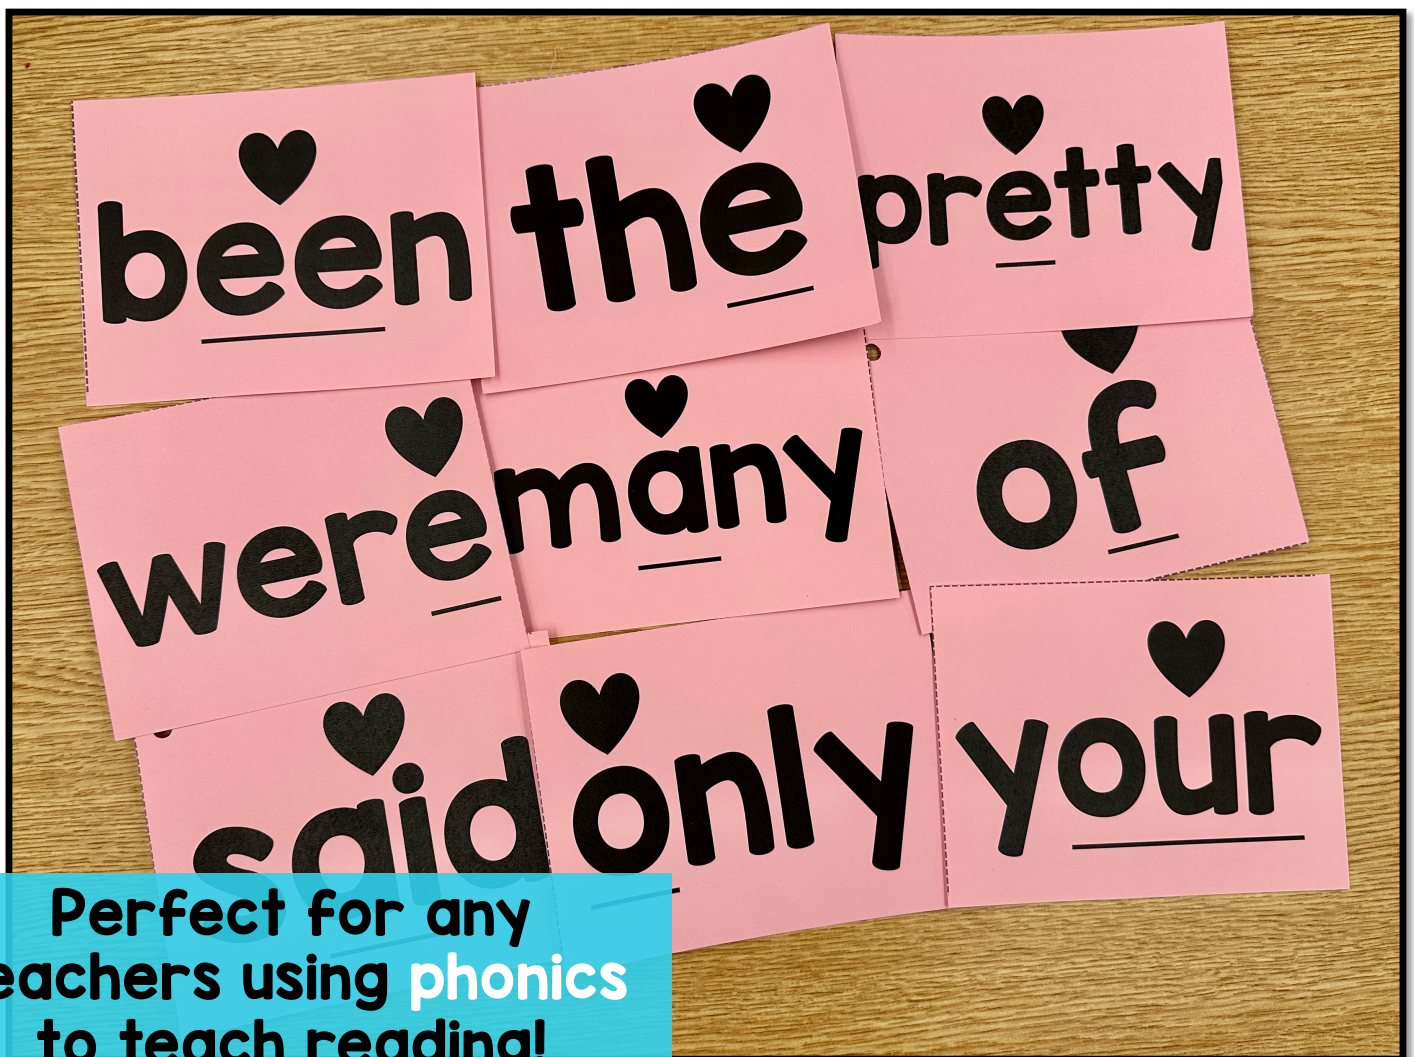

OVER
300
WORDS

EDITABLE + BLANK TEMPLATES

WHO IS IT FOR?

This resource was created for **any student(s)** who **need(s) to learn high frequency words.**

Perfect for any teachers using **phonics** to teach reading!

WHY HEART WORDS?

Teaching **heart words** instead of memorization (sight words) teaches students to **recognize the decodable parts of the word using phonics**, requiring them to **only memorize the irregular (or phonics skill not yet learned) part of the word** (the “heart part”).

HEART WORDS

FLASH CARDS

Wait! Lauren, why are there flash cards for phonetically spelled words? 🤔

Yes, the words *like* and *play* are decodable.

However, when do your students learn CVCe or long vowel teams?

Chances are, it would benefit them to be able to read the words *like* and *play* before learning these phonics skills.

Phonetically spelled high frequency words are temporary heart words (or flash words).

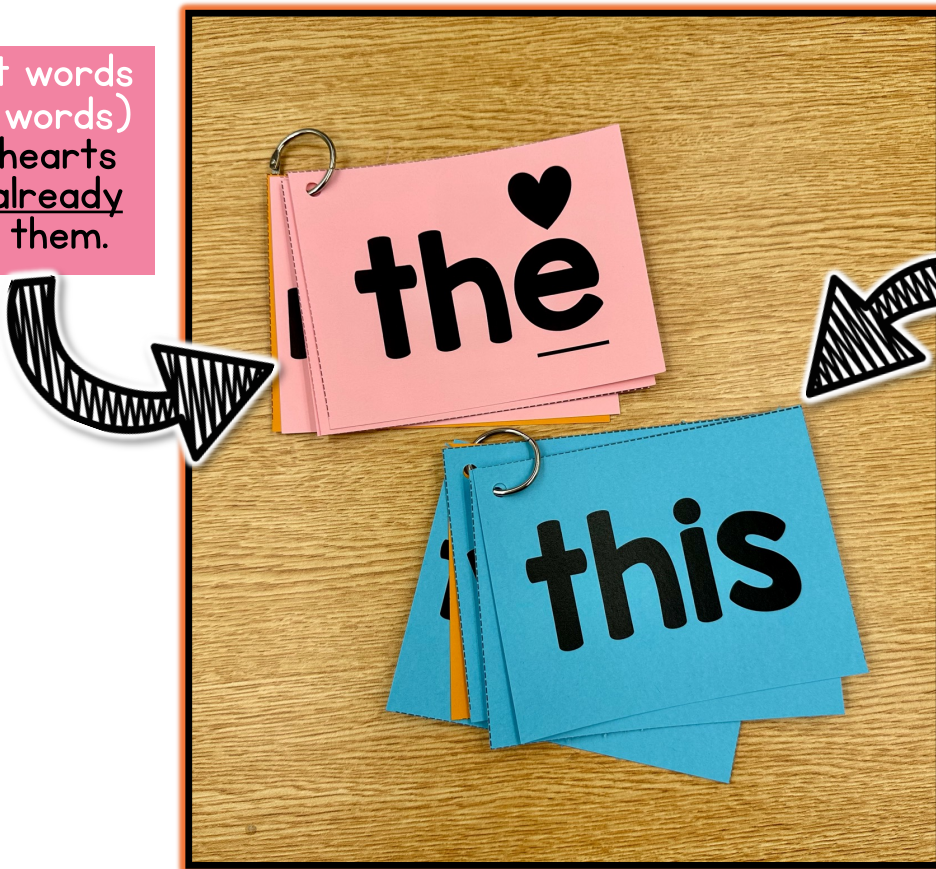

Depending on your **scope and sequence**, some of the words may no longer be “heart words” for your students.

This is another reason why this resource is **fully editable**.

HEART WORDS FLASH CARDS

two types of cards

True heart words
(irregular words)
have the hearts
and lines already
added to them.

Temporary heart
words (or flash
words) do NOT
have the hearts
and lines added
because the “heart
part” varies
according to your
phonics scope and
sequence. This is
why the flash
cards are fully
editable.

HEART WORDS FLASH CARDS

two ways to edit

print and write

Graphics Bank

Drag and drop what you need!

The lines can be shortened and lengthened by dragging the green dots at the end.

Select the line to make the green dots appear.

Use copy + paste to get more hearts and lines.
