INSULATION 

## ARCH® COZY AROUND®

### SO SOFT, SO WARM, SO COMFY

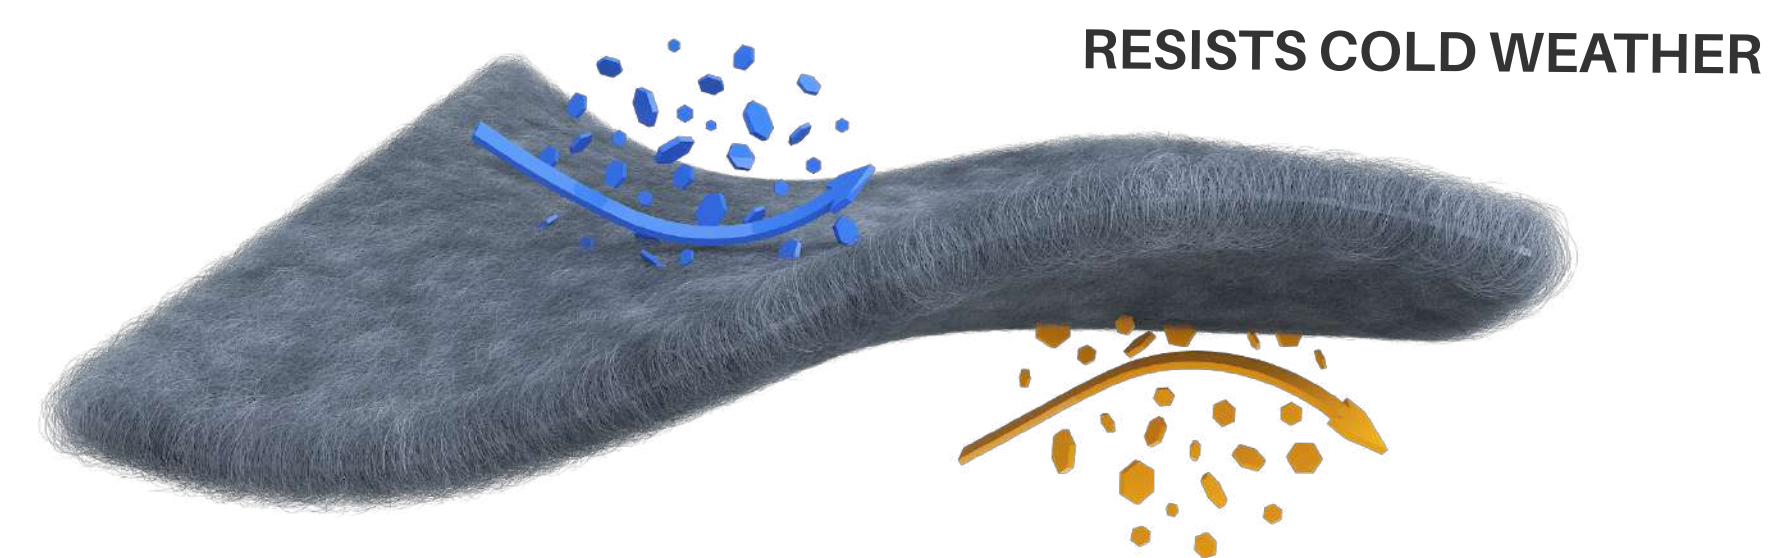

ARCH® Cozy Around® Fleece is designed for one's at home and on the go superior cozy comfort. We developed a comfortable thermal insulation fabric perfect for any of your textile needs. After repeated use and laundering, our fleece remains lightweight, soft, warm and extremely durable. For these reasons and more, ARCH® Cozy Around® Fleece is the ultimate choice for sweatshirts, blankets and any other premium bedding materials.

### TECHNOLOGY

ARCH® Cozy Around® fleece has a high pile fiber structure that produces thermal energy, prevents heat loss, and regulates warmth. Our unique knitting technique raises piled fibers for precise shearing into sheets of soft and fluffy fabric. This supple surface is more breathable, lightweight, and quick drying than anything to date. ARCH® Cozy Around® fleece's hydrophobic properties assist in the fabric's capability to repel water, resist saturation, and dry quickly, which makes for incredible versatility whether indoors or outdoors.

### RECOMMENDATIONS

ARCH® Cozy Around® fabrics are ideal for those in need of weather-resistant insulation. Our fabric's warmth, breathability, and lightweight nature provide outstanding comfort for a wide range of uses. This is the most versatile option when layering outerwear or producing sweatshirts, blankets, and other soft bedding.

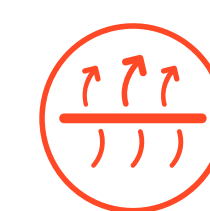

RETAINS THERMAL WARMTH

### BENEFITS

#### WEIGHTLESS WARMTH

Keep Warm to the body

#### HIGHLY BREATHABLE

Allows moisture vapor pass through & Keep comfortable

#### QUICK DRYING

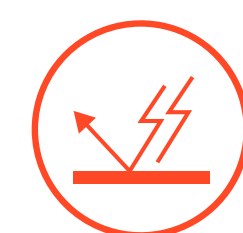

Keep Dry to the body

### AVAILABLE TECHNOLOGY

#### DURABLE WATER REPELLENCY

Provides long-lasting & Comfortable water resistant

#### ANTI-STATIC

Avoids electrostatic charges

#### RECYCLED WITH MAGNIF-ECO®

Made of recycled fiber

#### ODOR RESISTANCE WITH CUPLUS®

Reducing odor from the body
