

MEYER DYNASTY

MADE IN CANADA

DIMPLED NON-STICK SURFACE traps air while cooking to form a thin cushion to reduce sticking and holds oil underneath for better browning and searing.

Meyer's Dynasty fry pans are proudly manufactured in our state-of-the-art facility in Prince Edward Island. We combined our global cookware innovations with our commitment to quality to produce a world-class pan that provides fast, even heat control and superior cooking performance. Dynasty features a PFOA free non-stick coating, a durable riveted forged stainless steel handle and is safe for all stovetops including induction. The raised dimpled surface traps air while cooking to form a thin cushion to reduce sticking and holds oil underneath for better browning and searing. Oven safe to 400F/204C.
