### Grundfos instrumentation

#### Measurement and control

##### User-friendly units for every need

To complement the Grundfos range of dosing technology, you can choose from a full range of controllers and measuring cells to ensure precision performance and full system integration. Special attention has been paid to making everything user-friendly and flexible - a single unit will often be enough to cover all your measuring and control needs.

##### From electrodes to complete preassembled systems

The dosing instrumentation range extends from simple electrodes to preassembled measuring and control systems mounted on a single plate for easy and immediate installation. Within this range, you can also find everything from buffer solutions to hand-held photometric test units to optimize your dosing applications.

### Controllers

Controllers come in three categories:

- Conex® DIA
- DIP
- Conex® DIS.

#### Conex® DIA

##### Straight talk for everyone

The Conex® DIA (Dosing Instrumentation Advanced) series is designed to be easy to use for non-experts. A simple plain-text menu lets you complete your tasks quickly and easily without wasting any time on learning and deciphering codes. The units speak no less than seven languages, allowing virtually anyone to navigate the self-explanatory menus.

Conex® units monitor themselves, ensuring high water quality at all time. During calibration, they carry out a plausibility check to prevent mishaps. And the logbook function records sensor data and calibration values complete with date and time. The units also keep an eye on the temperature and make adjustments as necessary.

#### Conex® DIA-1

##### Universal measuring amplifier and controller

The Conex® DIA-1 is a sophisticated unit, ideal for use in many disinfection applications.

The easy-to-navigate user interface speaks seven languages. You also get access to

- an automatic self-adaption calibration feature
- manual or automatic temperature compensation
- a logbook function, among other features.

The Conex® DIA-1 can be incorporated in compact, wall-mounted preassembled systems with the measuring cells that suit you.

##### Monitoring and control parameters

- chlorine
- chlorine dioxide
- ozone
- hydrogen peroxide
- peracetic acid
- pH
- redox
- fluoride.

Fig. 1 Conex® DIA-1

Gra1029

### Conex® DIA-2

#### Dual measuring amplifier and controller

The Conex® DIA-2 essentially functions like two DIA-1 models combined in a single unit, allowing you to measure and control two parameters at the same time.

Both parameters are shown on the display. This two-in-one approach minimizes space requirements and installation time - and gives you all the Conex® benefits.

#### Monitoring and control parameters

##### Parameter 1

- chlorine
- chlorine dioxide
- ozone
- hydrogen peroxide.

##### Parameter 2

- pH.

Fig. 2 Conex® DIA-2

Gra1029

### Conex® DIA-2Q

#### Dual measuring amplifier and multi-functional controller

The Conex® DIA-2Q is a special version of the DIA-2, particularly suitable for variable flow rates. It has all the features of the DIA-2, but allows you to measure and control more parameters.

#### Monitoring and control parameters

##### Parameter 1

- chlorine
- chlorine dioxide
- ozone
- hydrogen peroxide
- peracetic acid.

##### Parameter 2

- pH
- fluoride
- redox.

Fig. 3 Conex® DIA-2Q

Gra1029

## DIP

### Triple measuring amplifier and controller for pools

The DIP (Dosing Instrumentation Pool) is specially designed for swimming pool applications. It measures up to three parameters and controls two parameters at the same time, giving you perfect control of the water quality of your pool.

The DIP speaks three languages (english, german and french), making it easy for non-experts to carry out all operations - particularly as a built-in plausibility check prevents operating errors.

Other highlights include maintenance-free measuring electrodes, a sample-water sensor to prevent overdosing, and a choice of control functions.

### Monitoring and control parameters

The DIP measures up to three parameters at the same time:

- chlorine or chlorine dioxide or ozone
- pH
- redox.

The DIP controls two parameters at the same time:

- chlorine, chlorine dioxide or ozone
- pH.

Fig. 4 DIP

### Conex® DIS

#### For instrumentation specialists

The Conex® DIS (Dosing Instrumentation Standard) is a simpler unit for amplifying and control. The controller is designed for those who want cost-efficient units and do not need the extra functionalities of the DIA series. Fitted with a powerful 16-bit microprocessor system and offering a choice of settings, the DIS models ensure high water quality while reducing the volumes of chemicals dosed. Simplicity and efficiency combined.

### Conex® DIS-C

#### Measuring amplifier and controller for conductivity

The Conex® DIS-C measures conductivity in a range of applications from bottle-washing to harsh desalination applications. This is because the DIS-C is available with a choice of conductive or inductive probes.

When fitted with conductive probes, the DIS-C is suitable for pressures of up to 232 psi at 77°F. The maximum operating temperature is 275 °F.

DIS-C models with inductive electrodes are ideal for aggressive media because the measuring loops do not come into contact with the sample water.

#### Monitoring and control parameters

Conductivity (using either conductive or inductive measuring probes).

Fig. 5 Conex® DIS-C

### Conex® DIS-PR

#### Measuring amplifier and controller for pH and redox

The Conex® DIS-PR is designed for pH and redox measuring and control. It is a compact, cost-efficient unit aimed at users who are familiar with measuring and control processes and wish to use numerical programming to manage them. The DIS-PR features an integrated

temperature function for added reliability.

#### Monitoring and control parameters

- pH
- redox.

Fig. 6 Conex® DIS-PR

### Conex® DIS-D

#### Measuring amplifier and controller for disinfection

The Conex® DIS-D is designed to control disinfection processes that use chlorine, chlorine dioxide, or ozone.

To ensure reliable operation, the DIS-D can be supplied with a separate sample water sensor that will immediately detect any shortage of sample water and give an alarm.

#### Monitoring and control parameters

- chlorine
- chlorine dioxide
- ozone.

Fig. 7 Conex® DIS-D

### Preassembled systems

Our preassembled systems take our tried-and-tested electrodes and Conex® controllers, combine them to suit specific applications, and mount them on a plate ready for quick installation.

Each combination is available with a choice of measuring cells and cleaning methods.

#### Preassembled systems can be fitted with these controllers:

- Conex® DIA-1
- Conex® DIA-2
- Conex® DIA-2Q
- DIP
- Conex® DIS-PR
- Conex® DIS-D.

For additional information on preassembled systems, see page 23.

### Measuring cells and electrodes

Our measuring cells and electrodes for dosing applications are made especially for all aspects of water treatment - eg for drinking water, boiler feed water, pure water, swimming pools and food industries such as dairies and breweries.

#### AquaCell measuring cells for chlorine, chlorine dioxide or ozone

The modular potentiostatic measuring cells are specially developed for disinfection processes.

The units feature integrated filter cartridges, regulating devices and temperature measurement. Cleaning is hydro-mechanical or carried out by an electric cleaning motor - and with a simple conversion kit you can always switch to motor cleaning later if you choose hydro-mechanical versions now.

The measuring cells are also available in pressure-proof versions for applications where no loss of sample water is acceptable.

#### Monitoring parameters

- chlorine
- chlorine dioxide
- ozone
- pH
- redox
- temperature.

### Single-rod probes and electrodes

Grundfos offers a range of simple sensors - single-rod probes and electrodes - for specific measuring needs. The wide choice ensures that you can always find a sensor to match your application.

#### Monitoring parameters

- pH
- redox potential
- temperature
- conductivity
- hydrogen peroxide
- peracetic acid
- fluoride.

### Wide range of electrode holders and accessories

Grundfos offers a wide range of equipment to assist your processes. Examples include single or complete electrode holders and flow-through fittings with electrode cables. Other accessories include buffer solutions, starting reagents, etc.

#### Monitoring parameters

- hydrogen peroxide
- peracetic acid
- pH
- redox
- temperature.

## DIT photometer

The DIT photometer is a compact and hand-held unit that lets you test a number of water parameters quickly and accurately.

The patented two-beam principle ensures that you get precise results within very short time.

You do not need to carry out zero-point adjustments for subsequent measurements; the results remain accurate even after repeated measuring.

### Monitoring parameters

- aluminum
- ammonium
- chlorine (free)
- chlorine (combined)
- chlorine dioxide
- chromium
- cyanide
- cyanuric acid
- iron
- fluoride
- hydrazine
- manganese
- nickel
- nitrate
- nitrite
- ozone
- pH
- phosphate
- redox
- temperature.

### Type key, controllers

Type key example: DIA-2Q 1-D/HP/PA 2-P/R/F Q-W-H

Example:	DIA	-2Q	1-D/HP/PA	2-P/R/F	Q	-W	-H
<b>Measuring amplifier and controller</b>							
DIA-1	Dosing Instrumentation Advanced with 1 input						
DIA-2	Dosing Instrumentation Advanced with 2 inputs						
DIA-2Q	Dosing Instrumentation Advanced with 2 inputs + flow measurement						
DIP	Dosing Instrumentation Pool						
DIS-C	Dosing Instrumentation Standard for conductive measurement						
DIS-PR	Dosing Instrumentation Standard for pH/redox measurement						
DIS-D	Dosing Instrumentation Standard for Cl <sub>2</sub> / ClO <sub>2</sub> / O <sub>3</sub>						
<b>Input parameter 1</b>							
CC	Conductivity - conductive						
CI	Conductivity - inductive						
P	pH						
R	Redox (ORP)						
D	Chlorine (Cl <sub>2</sub> ), chlorine dioxide (ClO <sub>2</sub> ) or ozone (O <sub>3</sub> )						
HP	Hydrogen peroxide (H <sub>2</sub> O <sub>2</sub> )						
PA	Peracetic acid (PAA)						
F	Fluoride (F <sup>-</sup> )						
<b>Input parameter 2</b>							
P	pH						
R	Redox (ORP)						
F	Fluoride (F <sup>-</sup> )						
<b>Input parameter 3</b>							
R	Redox (ORP)						
<b>Variant</b>							
Q	Flow compensation						
<b>Mounting</b>							
W	Wall-mounted						
P	Panel-mounted						
<b>Voltage</b>							
G	1 x 230 V, 50/60 Hz						
H	1 x 120 V, 50/60 Hz						
I	24 VDC						

### Type key, preassembled systems

Type key example: DIA-1-A, D1-AU-PC-QS-T, W-H

Example:	DIA	-1	-A	D1	-AU	-PC	-QS	-T	W	-H
<b>Units for measurement and control</b>										
DIA-1	Dosing Instrumentation Advanced with 1 input									Voltage
DIA-2	Dosing Instrumentation Advanced with 2 inputs									G      1 x 230 V, 50/60 Hz
DIA-2Q	Dosing Instrumentation Advanced with 1 inputs + flow measurement									H      1 x 120 V, 50/60 Hz
DIP	Dosing Instrumentation Pool									I      24 VDC
DIS-PR	Dosing Instrumentation Standard for pH/redox measurement									
DIS-D	Dosing Instrumentation Standard for Cl <sub>2</sub> / ClO <sub>2</sub> / O <sub>3</sub>									
<b>Assembly</b>										
A	Preassembled									
<b>Cell type</b>										
D1	Pressure-proof, with cleaning motor									
D2	Pressure-proof, with hydro-mechanical cleaning									
D3	Pressureless, with hydro-mechanical cleaning									
P/R	pH or redox only									
F	Fluoride only									
PA/HP	Peracetic acid or hydrogen peroxide only									
<b>Electrodes</b>										
Disinfection										
AU	Gold (for cell types D1, D2 and D3 only)									
PT	Platinum (for cell types D1, D2 and D3 only)									
X	No disinfection measuring									
Other electrodes										
PC	pH, ceramic diaphragm									
PT	pH, PTFE diaphragm									
PK	pH, KCl diaphragm									
PG	pH, gel filling									
RC	Redox, ceramic diaphragm									
RT	Redox, PTFE									
RR	Redox without reference system									
F	Fluoride									
PA	Peracetic acid									
HP	Hydrogen peroxide									
X	No electrode									
<b>Voltage</b>										
G	1 x 230 V, 50/60 Hz									
H	1 x 120 V, 50/60 Hz									
I	24 VDC									
<b>Mounting</b>										
W	Wall-mounted									
P	Panel-mounted									
<b>Temperature sensor</b>										
T	With Pt100									
X	No temperature censor									
<b>Flow sensor</b>										
QS	Flow sensor integrated									
X	No flow sensor									

### Type key, AquaCell

Type key example: AQC-D1, AU-PC-RC, QS-T, H

Example:	AQC	-D1	AU-PC-RC	QS	T	H
<b>Model</b>						
AQC	AquaCell					
<b>Application</b>						
D1	Pressure-proof, with cleaning motor (Cl <sub>2</sub> , ClO <sub>2</sub> , O <sub>3</sub> )					
D2	Pressure-proof, with hydro-mechanical cleaning (Cl <sub>2</sub> , ClO <sub>2</sub> , O <sub>3</sub> )					
D3	Pressureless, with hydro-mechanical cleaning (Cl <sub>2</sub> , ClO <sub>2</sub> , O <sub>3</sub> )					
<b>Electrodes</b>						
AU	Gold					
PT	Platinum					
PC	pH, ceramic diaphragm					
RC	Redox, ceramic diaphragm					
X	No electrode					
<b>Flow sensor</b>						
QS	Flow sensor					
X	No flow sensor					
<b>Temperature sensor</b>						
T	With Pt100					
<b>Voltage</b>						
G	1 x 230/240 V, 50/60 Hz					
H	1 x 115/120 V, 50/60 Hz					
I	24 VDC					
X	No voltage

## Instrumentation

### Conex® DIS-PR and Conex® DIS-D

#### General data

Electronics	Powerful 16 bit microprocessor
Display	One-line display
Indication mode	Measured value as a physical variable
Controllers	PI
Relay output	250 V max. load 1 A • Limit monitor, pulse-pause controller or pulse-frequency controller • Alarm relay (change-over contact)
Current output	1 analog output (0-20 mA or 4-20 mA); max. load: 400 Ohm: • continuous controller or • measured value
Temperature compensation	Manually or automatically by Pt100 temperature sensor, measuring range 32 to 212 °F (Conex® DIS-PR only)
Enclosure class	Wall-mounted: IP 65
Permissible temperature	Operation: 32 to 122 °F Storage: -4 to 149 °F
Permissible relative air humidity	Max. 90% at 104 °F (non-condensing)
Mains voltage	230/240 V ±10%, (50/60 Hz) or 115/120 V ±10%, (50/60 Hz) or 24 VDC
Power consumption	Approx. 10 VA
Weight	Approx. 2.2 lbs

#### Measuring parameters

	Possible measuring ranges	Conex® DIS-PR	Conex® DIS-D
Chlorine (Cl <sub>2</sub> ) / Chlorine dioxide (ClO <sub>2</sub> ) / Ozone (O <sub>3</sub> )	0.00 - 2.00 mg/l 0.0 - 20.0 mg/l	●	
pH	pH 0.0 - 14.00 pH 2.0 - 12.00 pH 5.00 - 9.00	●	
Redox	0 - 1000 mV 0 - 1500 mV	●	

#### Control functions

Setpoint	Adjustable within the measuring range, with the resolution of the measured value
Alarm setpoints	Adjustable within the measuring range
Hysteresis	0 to 50% of the measuring range limit value
Control response	Pulse-pause / pulse-frequency control (P, PI), limit monitor
Proportional band, X <sub>P</sub> (pulse-pause controller, pulse-frequency controller, continuous controller)	Adjustable from 0.0 to 3000% resolution 0.1% for range 0.1 to 100.0% resolution 1% for range 101 to 3000%
Reset time, T <sub>N</sub> (pulse-pause controller, pulse-frequency controller, continuous controller)	Adjustable from 0 to 3000 s resolution 1 s
Control direction	Adjustable: Upward or downward control
Pulse + pause time (pulse-pause controller)	Adjustable from 1 to 100 s resolution 1
On-time, T <sub>min</sub> (pulse-pause controller)	Initial pulse adjustable between 0.1 and 10.0 s, resolution 0.1 s
Max. frequency (pulse-frequency controller)	Adjustable from 1 to 220 pulses/min., one pulse width = 50 ms
Continuous controller	0-20 mA or 4-20 mA

## Instrumentation

### DIP

#### General data

Electronics	16 bit microprocessor system
Distance of sensors	Max. 3 meters
Display	2 x high resolution plain-text LCD
Indication mode	measured value as a physical variable
	1 collective alarm relay 1 stand-by relay
	For each parameter of groups 1 and 2: 1 alarm relay and 2 potential-free controller switch relays for chlorine ( $\text{Cl}_2$ ) (or chlorine dioxide ( $\text{ClO}_2$ )) or ozone ( $\text{O}_3$ )) and for pH, adjustable to: <ul style="list-style-type: none"> <li>• limit switch</li> <li>• or 2-position controller (pulse pause, pulse frequency)</li> <li>• or 3-position step controller           <ul style="list-style-type: none"> <li>- for chlorine (<math>\text{Cl}_2</math>)</li> <li>- or chlorine dioxide (<math>\text{ClO}_2</math>)</li> <li>- or ozone (<math>\text{O}_3</math>) with or without return</li> <li>- for pH without return.</li> </ul> </li> </ul>
Relay outputs (max. relay load 250 V/ 6 A, max. 550 VA)	4 analog outputs (0-20 mA or 4-20 mA), galvanically isolated from the inputs, for the measuring parameters: <ul style="list-style-type: none"> <li>• disinfection parameter chlorine (<math>\text{Cl}_2</math>) / chlorine dioxide (<math>\text{ClO}_2</math>) / ozone (<math>\text{O}_3</math>)</li> <li>• pH</li> <li>• redox</li> <li>• temperature.</li> </ul>
Signal outputs (max. load: 500 Ohm)	2 analog outputs (0-20 mA or 4-20 mA) for continuous controller <ul style="list-style-type: none"> <li>• disinfection parameter chlorine (<math>\text{Cl}_2</math>) / chlorine dioxide (<math>\text{ClO}_2</math>) / ozone (<math>\text{O}_3</math>)</li> <li>• pH (chlorine and pH)</li> </ul>
Interface	CAN bus
Temperature compensation	Manually or automatically by Pt100 sensor (23 to 248 °F, measured in °C or °F)
pH compensation	Automatically by pH measurement
Calibration	With plausibility check and buffer recognition
Permissible temperature	Operation: 32 to 122 °F Storage: -4 to 149 °F
Permissible relative humidity	Max. 90% at 104 °F (non-condensing)
Power consumption	Approx. 15 VA
Enclosure class	IP 65
Weight	Approx. 4.4 lbs

#### Measuring parameters and ranges

Parameter group	Parameter	Possible measuring ranges
	Chlorine ( $\text{Cl}_2$ ) [mg/l]	0.00 - 0.50 0.00 - 2.00 0.00 - 5.00 0.0 - 10.0 0.0 - 20.0 0.0 - 50.0
PG 1	Chlorine dioxide ( $\text{ClO}_2$ ) [mg/l]	0.00 - 0.50 0.00 - 1.00 0.00 - 2.00 0.00 - 5.00 0.0 - 10.0 0.0 - 50.0
	Ozone ( $\text{O}_3$ ) [mg/l]	0.00 - 0.50 0.00 - 1.00 0.00 - 2.00 0.00 - 5.00 0.0 - 10.0 0.0 - 50.0
PG 2	pH	0.00 - 14.00 2.00 - 12.00 5.00 - 9.00
	Redox [mV]	-1500 - +1500 0 - 1000

#### Control data

Description	Value
Setpoint	Adjustable as physical variable within the measuring range (eg: mg/l)
Hysteresis	0 to 50% of the upper limit of the measuring range
Setpoint selection	0 to 100% of the measuring range
Proportional band, $X_p$	0.1 to 3000%
Reset time, $T_N$	1 to 3000 s, resolution 1 s
Derivative action time, $T_V$	1 to 1000 s, resolution 1 s
Constant load	0 to 50%
Limitation of the maximum dosing capacity	From the adjusted constant load up to 100%
Control direction	Upward or downward control

### Preassembled systems

Conex® preassembled systems for chlorine ( $\text{Cl}_2$ ), chlorine dioxide ( $\text{ClO}_2$ ), ozone ( $\text{O}_3$ ), pH and redox (ORP)

GIA1026

Fig. 14 Conex® DIA-1 preassembled system

The system is equipped with one of these controllers:

- Conex® DIA-1
- Conex® DIA-2
- Conex® DIA-2Q.

The system is equipped with one of these AquaCells:

- D1, pressure-proof, with cleaning motor
- D2, pressure-proof, with hydro-mechanical cleaning
- D3, pressureless, with hydro-mechanical cleaning.

See page 24.

#### Features

- Mounted on a base plate and wired ready for connection
- With prepared cable sets
- With  $\text{Cl}_2$  electrode
- Optionally with pH electrode
- With a measuring range of 0 to 50 mg/l for  $\text{Cl}_2$ ,  $\text{ClO}_2$  or  $\text{O}_3$  (DIA-2: pH 0 to 14)
- With temperature compensation.

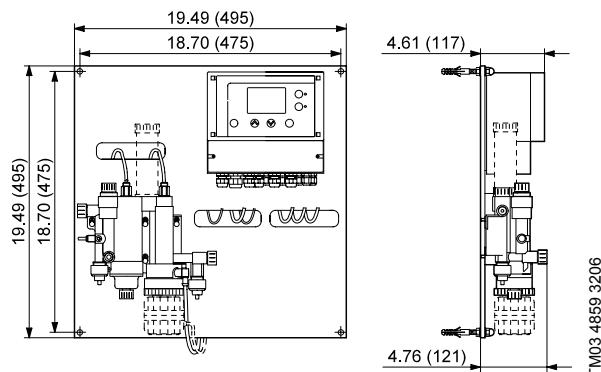

Fig. 15 Dimensions, inches (mm), Conex® DIA preassembled system

### Conex® preassembled system for chlorine ( $\text{Cl}_2$ ), chlorine dioxide ( $\text{ClO}_2$ ), ozone ( $\text{O}_3$ )

The system is equipped with Conex® DIS-D controller.

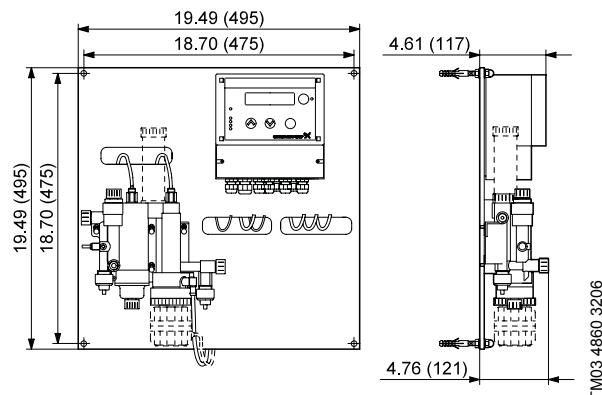

The system is equipped with one of these AquaCells:

- D1, pressure-proof, with cleaning motor
- D2, pressure-proof, with hydro-mechanical cleaning
- D3, pressureless, with hydro-mechanical cleaning.

See page 24.

### Features

- Mounted on a base plate and wired, ready for connection.
- With prepared cable sets
- With electrode for  $\text{Cl}_2$ ,  $\text{ClO}_2$  and  $\text{O}_3$
- With a measuring range of 0-20 mg/l for  $\text{Cl}_2$ ,  $\text{ClO}_2$  or  $\text{O}_3$
- Optional water sensor (1 meter of prepared cable).

**Fig. 16** Conex® DIS-D preassembled system for  $\text{Cl}_2$ ,  $\text{ClO}_2$  and  $\text{O}_3$

### DIP preassembled system for chlorine ( $\text{Cl}_2$ ), chlorine dioxide ( $\text{ClO}_2$ ), ozone ( $\text{O}_3$ ), pH and redox (ORP)

The system is equipped with a DIP controller and particularly suitable for swimming pool water disinfection.

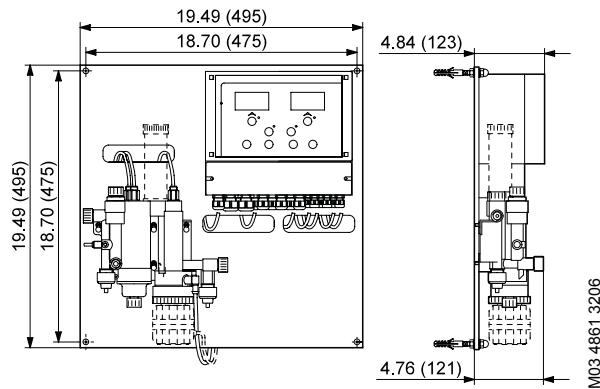

The system is equipped with one of these AquaCells:

- D1, pressure-proof, with cleaning motor
- D2, pressure-proof, with hydro-mechanical cleaning
- D3, pressureless, with hydro-mechanical cleaning.

See page 24.

#### Features

- Mounted on a base plate and wired ready for connection
- With prepared cable sets
- With  $\text{Cl}_2$  electrode
- With a measuring range of 0 to 30 mg/l for  $\text{Cl}_2$ ,  $\text{ClO}_2$  or  $\text{O}_3$
- With temperature compensation.

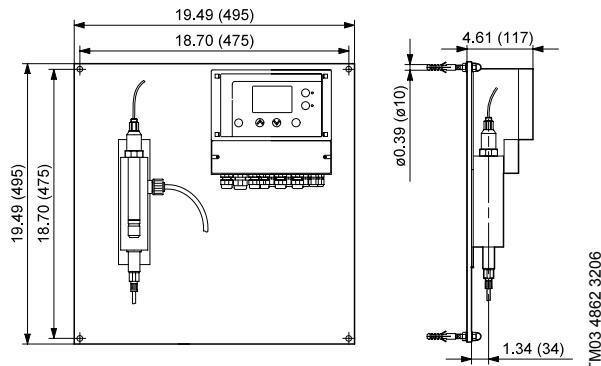

**Fig. 17** Dimensions, inches (mm), DIP preassembled system

### Conex® preassembled system for hydrogen peroxide ( $\text{H}_2\text{O}_2$ ) and peracetic acid (PAA)

The system is equipped with Conex® DIA-1 controller.

#### Features

- With Conex® DIA-1 and diaphragm-covered measuring cell
- Mounted on a base plate and wired ready for connection
- With a measuring range of 0 to 2000 mg/l for  $\text{H}_2\text{O}_2$  or PAA.

**Fig. 18** Dimensions, inches (mm), Conex® DIA-1 preassembled system for  $\text{H}_2\text{O}_2$  or PAA

### Conex® preassembled system for pH or redox (ORP)

The system is equipped with one of these controllers:

- Conex® DIA-1
- Conex® DIS-PR.

#### Features

- With sensors for pH or redox
- Mounted on a base plate and wired ready for connection
- With prepared cable sets
- With temperature compensation.

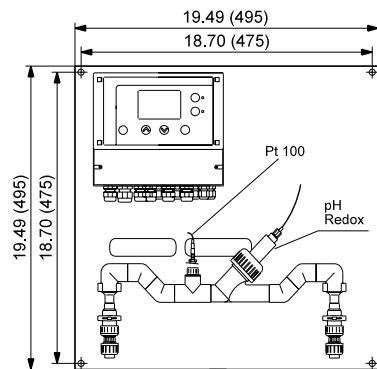

Fig. 19 Dimensions, inches (mm)

Mains voltage of the controller;

- 230/240 V (50/60 Hz)
- 115/120 V (50/60 Hz)
- 24 VDC.

This preassembled system incorporates:

- temperature sensor, with 1-meter cable
- pH single-rod probe, with 1-meter cable and ceramic or PTFE diaphragm.

### Conex® preassembled systems for fluoride (F<sup>-</sup>)

The system is equipped with Conex® DIA-1 controller.

#### Features

- With Conex® DIA-1 and with fluoride single-rod probe in a flow-type holder
- Mounted on a base plate and wired ready for connection
- With a measuring range of 0 to 2 mg/l for fluoride.

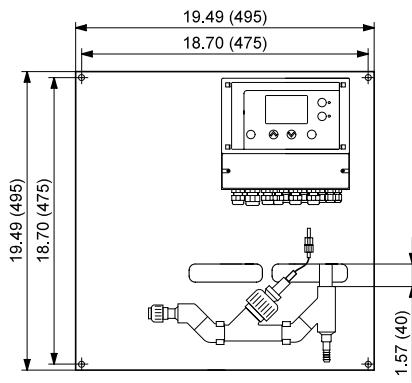

Fig. 20 Dimensions, inches (mm)

TM03 4863 3206

### AquaCells

AquaCells are modular, potentiostatic, combined measuring cells for chlorine ( $\text{Cl}_2$ ), chlorine dioxide ( $\text{ClO}_2$ ) and ozone ( $\text{O}_3$ ).

#### Features

- Proven potentiostatic three-electrode measuring method for measurement directly in the sample water
- Optimised electrode cleaning
- Integrated filter cartridge and regulating device
- Integrated temperature measurement
- Special measuring chamber with calibration cup for pH single-rod probe and redox electrode
- Excellent flow characteristics
- Maintenance-friendly design
- Non-wearing measuring and counter electrode for free chlorine ( $\text{Cl}_2$ ), chlorine dioxide ( $\text{ClO}_2$ ) or ozone ( $\text{O}_3$ ).
- Easy exchange of the reference electrode
- Conversion from hydro-mechanical to motor cleaning possible at any time with a conversion set
- Ready for wall-mounting connection, fastening kit included.

#### Types

Model	Description	Benefits
D1	Pressure-proof cell with cleaning motor	<ul style="list-style-type: none"><li>• No loss of sample water in case of closed cycles</li><li>• For drinking water, waste water, industrial water and brewery.</li></ul>
D2	Pressure-proof cell with hydro-mechanical cleaning (with integrated water sensor)	<ul style="list-style-type: none"><li>• No loss of sample water in case of closed cycles</li><li>• For swimming pool, hotel pool, therapeutic clinic pool water.</li></ul>
D3	Pressureless cell with hydro-mechanical cleaning	<ul style="list-style-type: none"><li>• Particularly suitable for swimming pool water disinfection</li><li>• <b>Note:</b> A free sample water outlet is required.</li></ul>

#### Measuring data

##### Measuring parameters - $\text{Cl}_2$ , $\text{ClO}_2$ , $\text{O}_3$

Measuring range	0.05 - 50 mg/l (according to controller settings)		
Measuring sensitivity	< 20 ppb (the equivalent of 0.02 mg/l)		
Measuring accuracy	< ±5% of upper end of measuring range		
Reproducibility	D1	D2	D3
	< ±3%	< ±5%	< ±4%
Response time t90	< 60 s		

##### Measuring parameters - pH, redox, temperature

pH	pH 0.00 - 14.00 (see controller)
Redox	-1500 to +1500 mV (see controller)
Temperature	-5 to +120°C / 23 to 248°F

### Legend

Pos.	Component
A	Holders for pH single-rod probe and redox electrode
B	Holder for the reference electrode ( $\text{Cl}_2$ , $\text{ClO}_2$ , $\text{O}_3$ )
C	Deareration
D	Sample water regulating device
E	Filter cartridge
F	Flow-type electrode holder
G	Screw-in part with ring, measuring electrode ( $\text{Cl}_2$ , $\text{ClO}_2$ , $\text{O}_3$ ) and integrated Pt100 temperature sensor
H	Measuring tube
J	Water sensor (incorporated in D2, available as an option for D1 and D3)
K	Sample water extraction device with extraction spindle
L	Calibration cup with sample water outlet
M	Draining spindle (at the calibration cup)
N	Cleaning motor (only D1)
O	Enclosure cylinder (only D3)
P	Stand pipe (only D3)
Q1/Q2	Connection for sample water inlet/outlet
R1/R2	Shut-off spindle for sample water inlet/outlet

### Technical data

AquaCell body	<ul style="list-style-type: none"> <li>Flow-type holder made of Plexiglass</li> </ul>

Permissible ambient temperature	0 to 40°C
Permissible storage temperature	AquaCell: -20 to +65°C Electrodes: -10 to +30°C
Permissible relative air humidity	Max. 90% (not condensing)
Water flow	Min. 20 up to approx. 60 l/h
Parts in contact with the liquid	PMMA, PVC, steel, PTFE, EPDM
Materials of electrodes	Gold or platinum (electrode $\text{Cl}_2$ , $\text{ClO}_2$ , $\text{O}_3$ ) glass, stainless steel, PVC
Connections, inlet/outlet	For PVC tube 6/12 or PVC pipe 12 x 1.2
Mains voltage of cleaning motor	230/240 V (50/60 Hz) 115/120 V (50/60 Hz) 24 VDC
Weight	Approx. 3.3 lbs (approx. 4.4 lbs including cleaning motor)

### Options

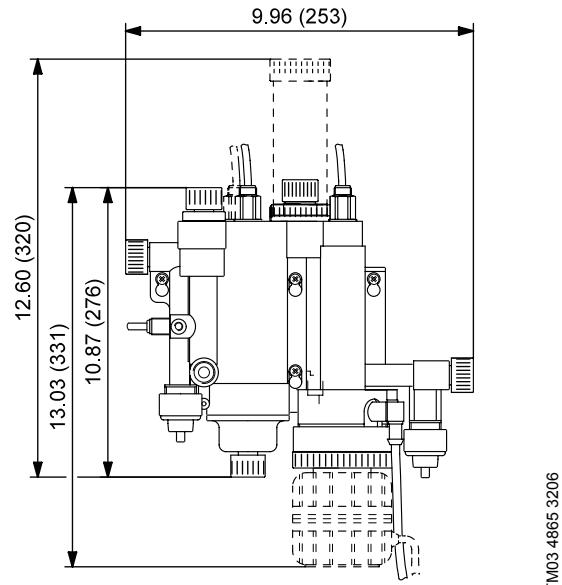

#### Measuring electrode for Cl<sub>2</sub>, ClO<sub>2</sub>, O<sub>3</sub>

- Gold or platinum material

#### Sensors for temperature, lack of sample water, pH, redox (non-prepared cables)

- Water sensor, with 3-meter cable
- pH single-rod probe, with 3-meter cable with ceramic or PTFE diaphragm
- Redox single-rod probe/electrode, with 3-meter cable with ceramic or PTFE diaphragm

### Dimensions

**Fig. 25** Dimensions, inches (mm), modular, potentiostatic, combined AquaCells for Cl<sub>2</sub>, ClO<sub>2</sub> and O<sub>3</sub>

### Measuring cells

**Measuring cells for hydrogen peroxide ( $H_2O_2$ ),  
peracetic acid (PAA) and fluoride ( $F^-$ )**

Diaphragm-covered measuring cells are available:

- for hydrogen peroxide
- for peracetic acid.

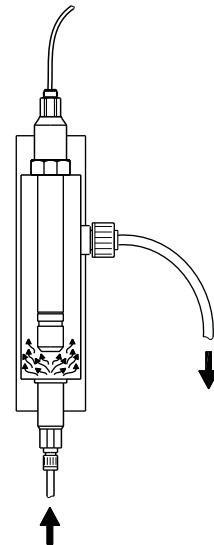

The cells are particularly suitable for disinfection in bottling plants (beverages and liquid food).

The cells consist of a flow-type holder and a diaphragm-covered measuring electrode. They have cable and plug.

TM03 4135 1706

**Fig. 26** Measuring cell for hydrogen peroxide and peracetic acid

TM03 4042 1406

**Fig. 27** Flow direction, measuring cell for hydrogen peroxide and peracetic acid

### Technical data

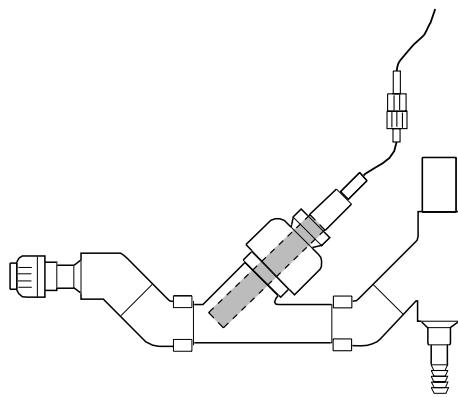

Description	Hydrogen peroxide ( $H_2O_2$ )	Peracetic acid (PAA)
Disturbances: no disturbances caused by tensides	Violent disturbances by PAA	Negligible disturbances by $H_2O_2$ , selectivity factor of 0.005
Response time, T90	~ 5 minutes	~ 3 minutes
Permissible ambient temperature	32 to 113 °F	32 to 122 °F
Sample water temperature.	32 to 131 °F	
Sample water flow	minimum 8 GPH	
Enclosure material	PVC, polycarbonate, stainless steel and silicone rubber, resistant to tensides and common water additives	
Connections, inlet	For 6/8 hose	
Weight	Approx. 0.2 lbs	
Resolution	1 mg/l	
Temperature drift	Negligible	
Product numbers	96622972	96622954

### Spare parts

Description	Product number	
	Hydrogen peroxide ( $H_2O_2$ )	Peracetic acid (PAA)
Diaphragm-covered electrode	96622973	96622959
Diaphragm cap incl. electrolyte, 100 ml	96622974	96622962
Electrolyte, 100 ml	96622975	96622966

### Measuring sensor for fluoride ( $F^-$ )

The sensor is suitable for applications where fluoride is added to the drinking water for the sake of health (caries prophylaxis).

TM03 4043 1406

**Fig. 28** Flow-type holder

### Description

Fluoride, single-rod probe with lanthanum, fluoride, monocrystal diaphragm, including cable and plug.

### Technical data

Description	Data
Measuring parameters	Fluoride, not complexed (eg of sodium fluoride ( $NaF$ ), hexafluorosilicic acid ( $H_2SiF_6$ ) or sodium silica fluoride ( $Na_2SiF_6$ ))
Sample water	Temperature: 32 to 122 °F pH: 5 to 8.5
Measuring range	0 to 2 ppm fluoride
Permissible ambient temperature	32 to 122 °F
Sample water flow	Approx. 86 to 122 °F
Material of flow-type holder	PVC
Temperature drift	Approx 1.1% per 1 °F (approx 2% per 1 °C)
Weight	Approx. 4.4 lbs

### Accessories

Description	Product number
Filling solution for fluoride probe, 50 ml	96622990
Fluoride standard solution 0.5 ppm effective, 100 ml	96622978
Fluoride standard solution 2.0 ppm effective, 100 ml	96622979

### Order data

Description	Product number
Fluoride single-rod probe	96622977

## Instrumentation

### Measuring cells for conductive conductivity measurement

#### Description

- PVC body or stainless steel body with inserts made of PVDF and FKM
- Two coaxial stainless steel electrodes
- Integrated platinum resistance thermometer
- Screw-in, 3/4" thread
- High-quality product for a long service life.

#### General data

Temperature range	32 to 275 °F
Maximum operating pressure	232 psi at 77 °F 131 psi at 140 °F
Connecting cable, 4 x 0.5 mm <sup>2</sup> , screened (max. 328 ft)	
Material of sensor body	PVC
Material of electrode	Stainless steel (AISI 316 Ti)
Temperature sensor	Pt100

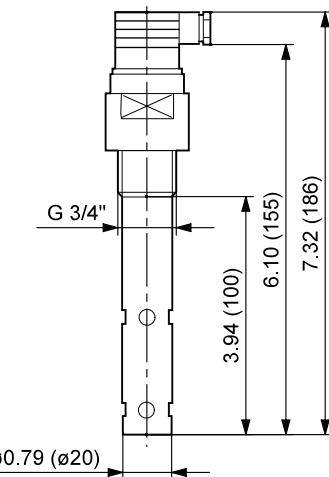

#### Order data

Measuring range	Cell constant	Product number
0.05-200 µS/cm	c = 0.05	96609150
1-2000 µS/cm	c = 0.2	96609151
50-20000 µS/cm	c = 1.0	96609152
Length		
Connecting cable, 4 x 0.5 mm <sup>2</sup> , screened (max. 328 feet)

### Measuring cell for inductive conductivity measurement

#### Description

- PVC-C body
- Internal ring-shaped measuring loops
- Full PVC enclosure
- Integrated Pt100 sensor
- 10-meter connection cable
- Screw-in,  $\frac{3}{4}$ " thread
- Suitable especially for aggressive liquids
- High chemical resistance
- Dirt-proof
- Sensor not in contact with liquid
- Compact design.

GrA1035p\_w

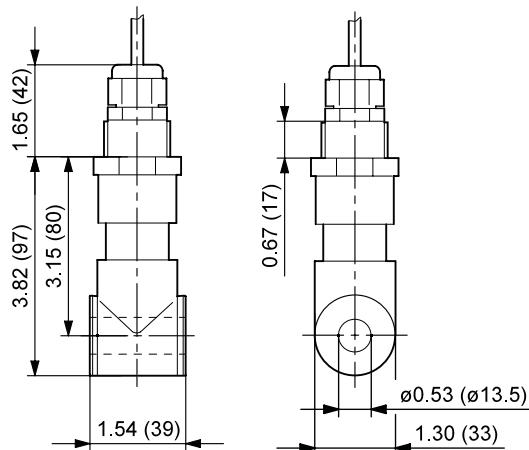

**Fig. 31** Measuring cell for inductive conductivity measurement

#### Technical data

Max. temperature	194 °F
Max. pressure at 20°C	87 PSI
Accuracy	$\pm 2\%$
Integrated temperature sensor	Pt100
Max. cable length	<ul style="list-style-type: none"> <li>• 100 meter</li> <li>• 20 meter at 0-2.000 mS/cm</li> </ul>
Connection cable	10 meter
Cell constant	c = 3.45

Filling solution for fluoride electrode			●	96622990	

### DIT photometer

#### Description

A compact photometer.

#### Features

- Multi-lingual plain-text operator prompting
- Up to 17 parameters can be measured
- Patented, two-beam principle with carrier frequency technology compensates for the effects of turbidity or external light.

#### Type key

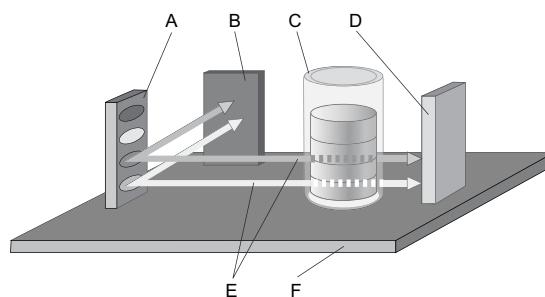

Example:	DIT	-B	C	-PT	GEF	G
<b>Model</b>						
DIT	Test photometer					
<b>Application</b>						
B	Pool water					
S	Drinking water					
N	Universal					
<b>Casing</b>						
C	With suitcase					
X	Without suitcase					
<b>Electrodes</b>						
PT	Hand-held pH probe					
RT	Portable redox probe					
X	No electrodes					
<b>Languages</b>						
GEF	German/English/French (standard version)					
GED	German/English/Danish					
GFD	German/French/Dutch					
<b>Voltage</b>						
G	1 x 230 V, 50/60 Hz, Euro plug					
I	9 V battery (model B and N only)					

GrA1020 / GrA1022

#### Legend

Pos.	Component
A	Light sources
B	Reference receiver
C	Vial
D	Measurement receiver
E	Light rays
F	Electronic plating

#### Accessories

Description	Product number
5 x vial/sealing plug for DIT	96623003
Chlorine reagent for DIT	96609167
Chlorine test vials for DIT	96623005
pH buffer solution	96609165
pH electrode for DIT	96609164
pH reagent for DIT	96609168
Redox buffer solution	96609166
Redox electrode for DIT	96623006

### Technical data

Optics	Patented two-beam principle with carrier frequency technology
Electronics	Microprocessor-operated with energy-saving CMOS technology
Display	Large alphanumeric, four-line LCD
Operation	Membrane keyboard with 4 keys, plain-text operator prompting
Memory	Approx. 100 measurements are memorised
Vials	Round vials of ø22 mm
Dimension	52 x 121 x 252 mm
Enclosure material	ABS
Enclosure class	IP 65
Permissible ambient temperature	41 to 113 °F
Temperature for storage of reagents	59 to 77 °F
Weight	Approx. 1.3 lbs

### Functions

Automatic stop (power down)	<ul style="list-style-type: none"> <li>After 45 s (photometrical measurement)</li> <li>After 80 s (electro-chemical measurement).</li> </ul>
Additional functions	<ul style="list-style-type: none"> <li>Real-time clock</li> <li>Zero-point adjustment by a keystroke</li> <li>Indication in mg/l or ppm.</li> </ul>

### Electronic data

Power supply	<b>DIT-B and DIT-N:</b> 9 V alkaline monoblock battery, plain-text display for battery exchange
	<b>DIT-S:</b> rechargeable accumulator set, plain-text display for accumulator recharge
Interfaces	<b>DIT-S:</b> RS 232, 4800 baud, 8 bit for log printer or PC connection
Additional equipment for electro-chemical measurement	<b>DIT-S:</b> BNC socket for pH and redox single-rod probes, socket for temperature sensor for measurement of: <ul style="list-style-type: none"> <li>pH value with temperature compensation</li> <li>redox potential (ORP).</li> </ul>

### Measuring parameters

#### Photometrical measurement

Parameter	Measuring range	Model		
		B	N	S
Aluminium	0.02–0.5 mg/l (ppm)	●	●	●
Ammonium	0.2–3.0 mg/l (ppm)	●	●	●
Chlorine (free or combined)	0.03–5.0 mg/l (ppm)	●	●	●
Chlorine dioxide	0.05–10.0 mg/l (ppm)	●	●	●
Chloride	1–25 mg/l (ppm)	●	●	●
Chromium	0.03–0.5 mg/l (ppm)	●		
Cyanide	0.01–0.7 mg/l (ppm)	●		
Cyanuric acid	1–200 mg/l (ppm)	●	●	●
Iron	0.1–1.2 mg/l (ppm)	●	●	●
Fluoride	0.1–2.0 mg/l (ppm)	●	●	●
Hydrazine	0.05–3.0 mg/l (ppm)	●		
Manganese	0.05–4.0 mg/l (ppm)	●		
Nickel	0.05–4.0 mg/l (ppm)	●		
Nitrate	0.5–30.0 mg/l (ppm)	●	●	●
Nitrite	0.02–1.0 mg/l (ppm)	●		
Ozone	0.03–3.0 mg/l (ppm)	●	●	●
pH	6–8.5 pH	●	●	●
Phosphate	0.07–4.5 mg/l (ppm)	●		

#### Electro-chemical measurement

Parameter	Measuring range	Model		
		B	N	S
pH	0–14 pH	●	●	●
Redox (ORP)	-1190 to +1190 mV	●		
Temperature	-4 to 176 °F	●	●	●

### Electrode holders

#### Electrode holders for pH, redox and temperature measurement

Description	Product number
Immersion electrode holder, PP, for up to three electrodes, adjustable length up to 1000 mm	96627432
Immersion electrode holder, PP, for up to three electrodes, adjustable length up to 2000 mm	96627433
Flow-type electrode holder, PVC, for one electrode (pH or redox), electrode protection, DN 20 connection, PN 10, max. 122 °F (50 °C)	96609169
Flow-type electrode holder, stainless steel AISI 316 Ti, for one electrode (pH or redox), electrode protection, 3/4" outer thread, PN 10, -20 to 275 °F (-30 to 135 °C)	96609170

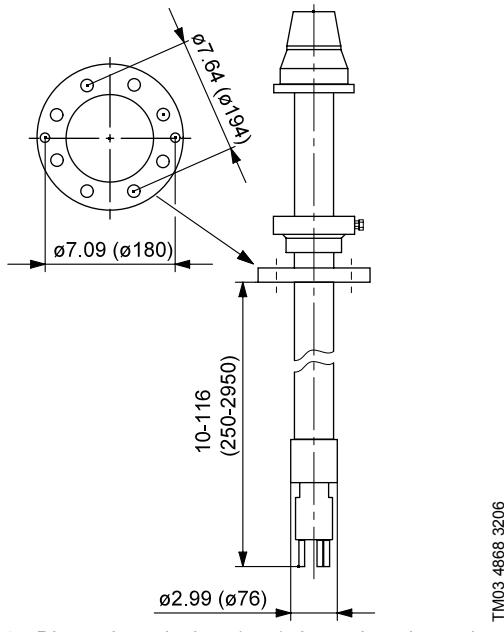

Fig. 36 Dimensions, inches (mm), Immersion electrode holder

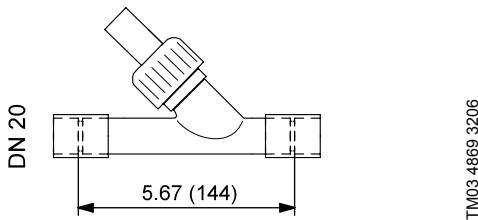

Fig. 37 Flow-type electrode holder

### Electrode holders for conductivity measuring cells

#### For conductive measuring cells

- Easy installation and commissioning
- Reliable measurement
- Quick dismantling of the electrode for cleaning or maintenance.

#### Order data

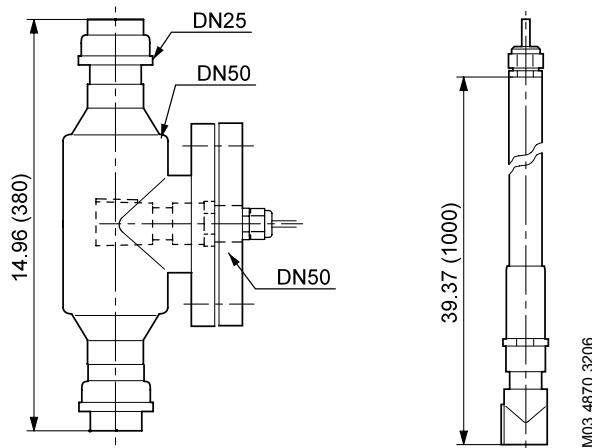

Description	Max. temperature/ pressure	Product number
Flow-type holder, PVC, DN 25	122°F / 87 psi (50°C / 6 bar)	96627404
Flow-type holder, stainless steel, DN 25	212°F / 145 psi (100°C / 10 bar)	96627405

#### For inductive measuring cells

- Easy installation and commissioning
- Reliable measurement
- Quick dismantling of the electrode for cleaning or maintenance.

#### Order data

Description	Max. temperature	Product number
Flow-type holder, PVC, DN 25	122°F (50°C)	96627408
Flow-type holder, PP, DN 25	194°F (90°C)	96627409
Immersion holder, PVC	122°F (50°C)	96627430
Immersion holder, PP	194°F (90°C)	96627431

**Fig. 38** Dimensions, inches (mm), electrode holders for inductive measuring cells

### Electrode holders

Description	DIA			DIP	DIS			Product number
	DIA-1	DIA-2	DIA-2Q		DIS-C	DIS-D	DIS-PR	
Flow-type holder, PVC, DN 25, 122°F / 87 psi (50°C / 6 bar)				●				96627404
Flow-type holder, stainless steel, DN 25, 212°F / 145 psi (100°C / 10 bar)				●				96627405
Flow-type holder, PVC, DN 25, 122°F (50°C)				●				96627408
Flow-type holder, PP, DN 25, 194°F (90°C)				●				96627409
Immersion holder, PVC, 122°F (50°C)				●				96627430
Immersion holder, PP, 194°F (90°C)				●				96627431

### Cables

Description	DIA			DIP	DIS			Product number
	DIA-1	DIA-2	DIA-2Q		DIS-C	DIS-D	DIS-PR	
Cable, 5 meters, for conductive conductivity probe				●				96611925
Cable, 15 meters, for conductive conductivity probe				●				96611928
Cable, 25 meters, for conductive conductivity probe				●				96611929
Cable, 5 meters, for inductive conductivity probe				●				96611940
Cable, 15 meters, for inductive conductivity probe				●				96611941
Cable, 25 meters, for inductive conductivity probe				●				96611942
Cable, 1 meter, for reference, pH and ORP electrode	●	●	●	●	●	●		96609182

# Further product documentation

Instrumentation

## WebCAPS

WebCAPS is a **Web-based Computer Aided Product Selection** program available on [www.grundfos.com](http://www.grundfos.com).

WebCAPS contains detailed information on more than 185,000 Grundfos products in more than 20 languages.

In WebCAPS, all information is divided into 6 sections:

- Catalogue
- Literature
- Service
- Sizing
- Replacement
- CAD drawings.

This screenshot shows the Catalogue section for a CR 10 pump. It displays the pump's technical specifications, including its name (CR 10), type (Vertical multistage centrifugal pump), and operating parameters (Voltage: 230-230/240 V, Frequency: 50 Hz). Below this, there are two graphs: one for head (Q-H curve) and another for flow (Q-N curve).

### Catalogue

This section is based on fields of application and pump types, and contains

- technical data
- curves (QH, Eta, P1, P2, etc) which can be adapted to the density and viscosity of the pumped liquid and show the number of pumps in operation
- product photos
- dimensional drawings
- wiring diagrams
- quotation texts, etc.

This screenshot shows the Literature section for a CR pump. It lists various documents such as brochures, service kits, and technical reports. On the right, there is a preview of a 'GRUNDFOS DATA BOOKLET' for Vertical multistage centrifugal pumps at 50 Hz.

### Literature

In this section you can access all the latest documents of a given pump, such as

- data booklets
- installation and operating instructions
- service documentation, such as Service kit catalogue and Service kit instructions
- quick guides
- product brochures, etc.

This screenshot shows the Service section for a CR pump. It lists various service parts like pump heads, shafts, and bearings. On the right, there is a detailed technical diagram of a pump assembly with various components labeled.

### Service

This section contains an easy-to-use interactive service catalogue. Here you can find and identify service parts of both existing and discontinued Grundfos pumps.

Furthermore, this section contains service videos showing you how to replace service parts.

# Further product documentation

Instrumentation

## Sizing

This section is based on different fields of application and installation examples, and gives easy step-by-step instructions in how to

- select the most suitable and efficient pump for your installation
- carry out advanced calculations based on energy consumption, payback periods, load profiles, life cycle costs, etc.
- analyse your selected pump via the built-in life cycle cost tool
- determine the flow velocity in wastewater applications, etc.

A screenshot of the Grundfos WebCAPS software interface. The top part shows a search criteria panel with Frequency (50 Hz), Manufacturer (GRUNDFOS), and Keyword (ejector). Below it is a table of replacement pumps. The table includes columns for Product No., Product name, Phase, and U[V]. The table lists several Grundfos CR models. At the bottom of the table, there are buttons for "Print PDF" and "Close".

## Replacement

In this section you find a guide to selecting and comparing replacement data of an installed pump in order to replace the pump with a more efficient Grundfos pump.

The section contains replacement data of a wide range of pumps produced by other manufacturers than Grundfos.

Based on an easy step-by-step guide, you can compare Grundfos pumps with the one you have installed on your site. When you have specified the installed pump, the guide will suggest a number of Grundfos pumps which can improve both comfort and efficiency.

A screenshot of the Grundfos WebCAPS software interface. It shows a list of CAD files for a specific product, with checkboxes next to each file name. The list includes various file types such as DXF, DWG, and STEP. At the bottom of the list, there is a note: "Download and you will be offered a ZIP file containing the selected files".

## CAD drawings

In this section it is possible to download 2-dimensional (2D) and 3-dimensional (3D) CAD drawings of most Grundfos pumps.

These formats are available in WebCAPS:

2-dimensional drawings:

- .dxf, wireframe drawings
- .dwg, wireframe drawings.

3-dimensional drawings:

- .dwg, wireframe drawings (without surfaces)
- .stl, solid drawings (with surfaces)
- .epri, E-drawings.

## WinCAPS

Fig. 40 WinCAPS CD-ROM

WinCAPS is a **Windows-based Computer Aided Product Selection** program containing detailed information on more than 185,000 Grundfos products in more than 20 languages.

The program contains the same features and functions as WebCAPS, but is an ideal solution if no Internet connection is available.

WinCAPS is available on CD-ROM and updated once a year.
