Glitter Tattoos

Instructions

WARNING!

Only for use by children over 8 years old.

Not suitable for children under 36 months due to small parts that may represent a choking hazard. Adult supervision is recommended. Read the instructions before use, follow them and keep them for reference. **We recommend testing by applying adhesive to a small area of the arm and leaving for ½ hour before applying tattoos.** **If the adhesive causes redness, inflammation, or soreness, wash off immediately and do not apply glitter tattoos to your skin.** Do not apply glue or glitter close to the eyes or mouth. Do not swallow or inhale the glue or glitter. Use contents within 6 months of opening the individual containers. In case of an adverse reaction, wash off immediately with soap and water, and rinse the affected area well with plenty of clean water. If swallowed: Do not induce vomiting. Drink some fresh water and seek medical advice should you suffer any symptoms. In case of eye contact: Wash out eye with plenty of water, holding eye open. Seek immediate medical advice. Clean any spills with kitchen paper and clean water. Dispose of any surplus materials in the household waste.

Advice for supervising adults:

This toy is for use only for children over the age of 8 years. Read and follow these instructions, the safety rules and the first aid information and keep them for reference. Incorrect use of chemicals can cause injury and damage to health. Only carry out those activities which are listed in the instructions. Because children's abilities vary so much, even within age groups, supervising adults should exercise discretion as to which activities are suitable and safe for them. The instructions should enable supervisors to assess any activity to establish its suitability for a particular child. The supervising adult should discuss the warnings, safety information and the possible hazards with the child or children before commencing the activities. The area surrounding the activity should be kept clear of any obstructions and away from the storage of food. It should be well lit and ventilated and close to a water supply. The working area should be cleaned immediately after carrying out the activity.

GLITTER INGREDIENTS: RAYON, GLYCERIN, UREA, CALLITRIS QUADRIVALVIS GUM, POLYURETHANE-35, COPERNICIA CERIFERA CERA (COPERNICIA CERIFERA (CARNAUBA) WAX), SILICA. Contents

28 Stencils

4 x Pots of Body Bio-Glitter*

(Pink, Turquoise, Yellow, Black)

3 x Sheets of Glow in the Dark Tattoo Transfers

1 x 5ml Cosmetic Glue

1 x Soft Paint Brush

1 x Stiff Paint Brush

*Eco-friendly cosmetic Bio-Glitter© designed to biodegrade quickly and safely in natural freshwater environments.

Preparation

Before you apply your tattoos, you'll want to charge them. Begin by placing the glow-in-the-dark tattoo transfers under direct sunlight or an artificial light (such as a lamp) to charge for 2-3 hours. This will help your tattoos glow!

Applying a Tattoo

Applying **FabLab Tattoos** is super easy!

First choose a tattoo and find the corresponding glitter stencil. Set the stencil aside for now. Then, cut out the tattoo, keeping as close to the design as possible.

Decide where you would like to apply your tattoo. Before application, make sure your skin is clean, dry and free of oils or makeup.

When you're ready to apply the design, remove the clear top sheet from the tattoo firmly onto your skin with the design facing down.

Run a sponge under water so it is damp, but not dripping. Dab the sponge against the tattoo to saturate the entire paper backing.

Then, holding the damp sponge against the back of the tattoo, press down and hold for thirty seconds.

Very gently peel off the backing paper by taking hold of one corner first. Slowly and smoothly peel the paper away from your skin. Let the area dry completely.

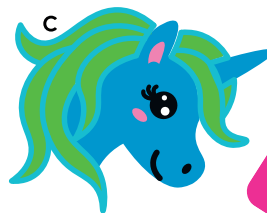

Applying the Glitter

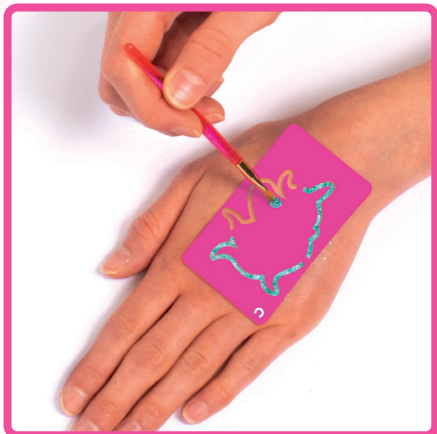

Once you've applied the tattoo transfer, you can apply the glitter!

Tattoo transfers have letters that correspond to a glitter stencil. Find the correct stencil for the transfer you applied.

Carefully peel the stencil from the backing paper and align it around the tattoo transfer. Press the stencil gently into place, ensuring that there are no creases or air bubbles in the stencil.

Shake the glue bottle, then unscrew the lid and use the brush in the lid to apply a thin coat of the cosmetic glue to the whole cut-out area of the stencil, overlapping the glue by about 2mm onto the edges of the stencil.

Let the glue dry slightly for 30 seconds before applying the glitter.

Unscrew the lid of the pot for the chosen colour of glitter and remove the plastic insert.

As soon as you have covered the glue area with glitter, carefully peel the stencil off the skin, leaving the glitter tattoo behind. Do not wait for the glue to dry fully.

Top Tip:

If the edges of the tattoo start to lift with the stencil, you can dab them gently with the soft brush to make sure that the tattoo breaks neatly along the edges of the stencil.

Use the stiffer brush to gently brush away any excess glitter which may have stuck to your skin.

Removing Your Tattoo

The tattoo transfers are designed to withstand soap and water, so follow these removal tips.

Apply baby oil or skin moisturiser to the tattoo transfer, and leave for 5 minutes before washing off the tattoo with soap and warm water.

Alternatively, you can remove your tattoo with soap and water. It will take a bit of time and rubbing, but it will come right off.

After removal, it is a good idea to apply skin moisturiser in the area where you had the Glow in the Dark tattoo.

Mobile Phone Holder

Included in your FabLab kit is a mobile phone holder, which lets you easily view our cool “how-to” videos packed with exciting content to discover new techniques and styles.

Simply place your phone into the holder and go to our channel at [youtube.com/fablabuk](https://www.youtube.com/fablabuk).

Share your favourite designs!
