

WPS PRESSURE SWITCHES

WPS Pressure Switches are versatile switches suitable for various water applications. They are reliable for controlling pumps with high voltage or a low voltage signal from controllers. The settings and dead band are easily adjustable via flat head screws inside the switch. For ease of installation, the switches are connected via 1/4" FNPT Stainless Steel base. The pressure switch can be mounted in any orientation for easy serviceability.

FEATURES

- Easy installation
- Universally interchangeable
- Female connection
- Adjustable low pressure cut-off
- Stainless steel base

SPECIFICATIONS

- **Electrical:** 240 VAC, 12A / 120 VAC, 20A
- **Diaphragm Material:** Nitrile
- **Weight:** 0.88 lbs (0.4 kg)

APPLICATIONS

- Potable water pump
- Irrigation pumps
- Well pumps

Pressure Range—Normally Closed			
Model	Adjustment Range (PSI / Bar)	Factory Preset (PSI / Bar)	Differential (PSI / Bar)
1	15-80 / 1.0-5.5	20-40 / 1.4-2.8	15-30 / 1.0-2.1

Pressure Range—Normally Open			
Model	Adjustment Range (PSI / Bar)	Factory Preset (PSI / Bar)	Differential (PSI / Bar)
2	80-15 / 5.5-1.0	40-20 / 2.8-1.4	15-30 / 1.0-2.1
