- 1 x Fairy Caravan
- 1 x Fairy Bridge
- 1 x Posts with Cord and Bunting
- 1 x Grass Seed
- 1 x Red Amaranth Seed
- 1 x Multi-Colour Gravel (for path)
- Fairy Flowers

*Please Note:  
You will need some grass seed  
and soil or compost (not included  
in this kit)*

## Introduction

Join Fairy Sweet Pea and her Unicorn friend in their caravan journey to the magical Unicorn Garden.

Grow the grass seeds and create a beautiful living garden, where they can live happily. You can also grow gorgeous red edible leaves in the removable roof top planter (seeds included, just add soil).

This 'Grow & Play' playset comes with a beautifully detailed caravan, that is home to Fairy Sweet Pea, Unicorn and their Mouse friend.

## Creating Your Unicorn Garden

### 1. Add Soil to the Unicorn Garden Bowl

Fill the bowl nearly to the top with some sieved soil or multi-purpose compost available from garden centres. The soil or compost should be damp but not too wet. Firm the soil down to make a smooth and stable surface.

### 2. Plant seeds in the roof planter.

Fill the planter nearly to the top with some sieved soil, evenly scatter the Red Amaranth seeds into the roof planter. Water and watch them grow.

### 3. Assemble the Bunting

To assemble the bunting, follow the guide below. Once complete, place it in the Garden by pushing the poles into the soil.

Peel the bunting from the backing sheet, place the unfolded piece of bunting on the string.

Fold the bunting over the string.

### 4. Assemble the Bridge

Clip the sides of the bridge to the main walkway.

### 5. Position the Bridge

The bridge can rest in two different ways on the bowl.

### 6. Assemble the Bench

Clip the bench to the inside of the caravan.

Place the mouse onto the heart shaped bump on the caravan to hold him in place.

### 7. Make a Path & Sow the Seeds

Use the multi-coloured gravel to make a path that starts in the centre of the bowl and finishes at the edge.

Add the remaining Red amaranth seeds towards the end of the path. Evenly scatter grass seed over the bare areas of soil. Carefully sprinkle water over the seeds so they are damp. Be careful not to add too much water.

### Caring for your Unicorn Garden

Depending on the temperature, the grass will take about 1 or 2 weeks to start growing. Place the garden in plenty of light (a window sill is ideal). Check it every day to make sure the soil does not dry out. Sprinkle more water on the seeds if needed. When the grass begins to grow, keep the soil moist but don't add too much water or it will make a very muddy garden! It will take a few days for the grass to grow into a lawn. To keep it looking nice, occasionally trim the grass with a pair of scissors. (Ask a grown up to help with this).
