# WORLD GEMOLOGICAL INSTITUTE™

## DESCRIPTION

ONE (1) FACETED GEMSTONE. SPECIES: NATURAL CORUNDUM. VARIETY: TEAL SAPPHIRE.

**Center Stone**

| | |
|---|---|
| Shape And Cutting Style | **Oval Mixed Cut** |
| Carat Weight | **1.68 carat** |
| Color Grade | **Greenish Blue** |
| Clarity Grade | **Eye Clean** |
| Measurements | **7.65 X 6.48 X 4.09 mm** |

**Comments**

Indication of thermal enhancement.
Colour uniformity: Good.
Transparency: Transparent.
Origin opinion: Africa.

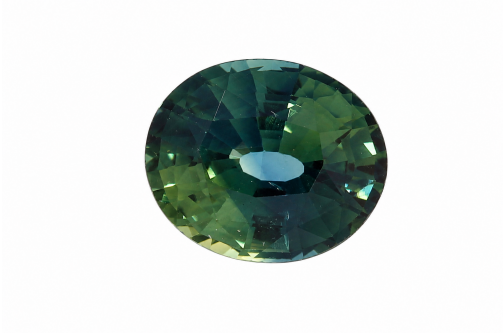

**WGI ™ CERTIFICATE NUMBER**

WGI ™ HUE WHEEL

**WGI™ Gemological Analysis is based on strict standards and internationally accepted grading tecniques which the laboratories are committed to. Using professional equipment and terminology, this report represents a gemological opinion and does not serve in any case a guarantee or warranty. HPHT (high pressure high temperature) is a treatment to enhance the diamond's color. Clarity enhanced" refers to laser drilling and / or fracture filling tecniques to improve clarity of a diamond and its appearance. Weights and measurements are approximate. The mounting can limit the ability to see the characteristics and signs of treatment. The valuation refers to a recommended retail price (RRP).**
