Applying Hairlights

Hairlights wash out of your hair easily, but they can temporarily stain your skin, so always wear gloves when applying.

Select a small section of hair and separate it out. Open your Hairlights and gently rub it down the length of hair you want to colour. Repeat this action several times (always going from the top to the bottom!). The more you repeat, the more colour you'll leave in your hair.

You can colour streaks in your hair by repeating this process with different colours on different strands of hair.

Dip Dye

To create multi-colour dip dye in your hair, start at the bottom of your hair. Put the hairdresser's clips where you want your first colour to start, about 4 - 5cm from the bottom of your hair works well. Apply the first colour, covering all the strands with colour, then move the clips up to where you want the second colour to begin and colour the hair between the clips and the first colour.

Plaiting

Plaiting either streaks of colour or 'dip dye' hair can give a whole new look to your hair!

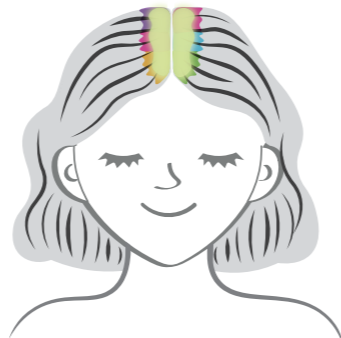

Applying Glow In The Dark Hair Gel

1. Pop on the gloves
2. We recommend applying the gel to small areas of your hair rather than all over, as this may lead to clumping. Squeeze a small amount of hair gel onto your fingertips and rub together to coat your hands evenly. Then rub it into the strands of your hair gently. The more gel you apply, the more your hair will glow!
3. Whilst the gel is wet you can style your hair however you like - For a slick straight hair look, comb the gel through your hair. Or to encourage curls, scrunch or twist your hair around your fingers.
4. Allow to dry and glow up! (If the gel has lost its glow, stand in daylight for a few minutes or under a lamp - ensuring you're not looking in direct sunlight or light.)

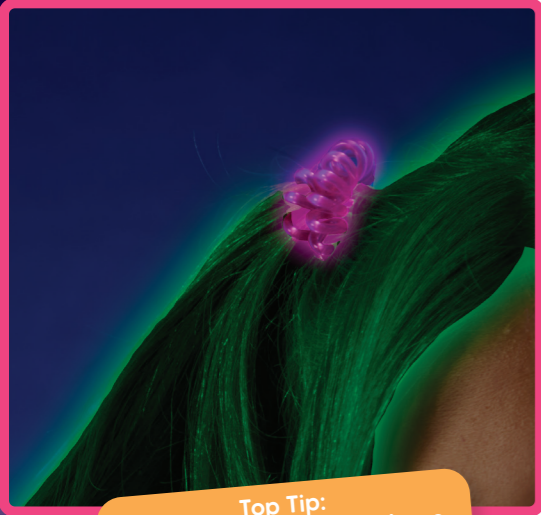

section

Tip: You can also plait your hair after adding gel to some strands!

Tip: Or why not go for a bold look and apply chalk and gel to your roots?

Top Tip:
Make your neon hair colours glow! Apply the hair chalk, then apply the gel to make your hair glow in the dark.

Straightening & Curling

You can curl or straighten your hair either before or after applying colour.

Hair Spray

Hair Spray can be applied over Hairlights to help maintain the colour in your hair until you wash it out.

Removing Your Hairlights

Hairlights and gel will wash out of your hair using normal hair shampoo and warm water.
