Alcohol

Product Highlights

Espumil is a lipophilic foam base solution where the foam is generated by foam-activating packaging. The unique delivery features of Espumil assure simple application of lipophilic active pharmaceutical ingredients on difficult to treat areas, like hairy skin and the scalp, without dripping. This product is free of fragrances, dyes, parabens, mineral oil, SLS and 1,4-dioxane, only contains low concentrations of ethanol and propylene glycol and is gently preserved.

- Creamy foam formula with minimal greasiness
- Without gaseous propellants
- Unique compatibility and proven stability with lipophilic APIs such as Minoxidil

Ingredients

Aqua purificata, Alcohol, Propylene glycol, Lactic acid, Polysorbate 20, Cocamidopropyl betaine, BHT

Specifications

Espumil is a clear, mostly odorless, solution

- pH: 1.5 – 3.5
