Product Highlights

SaltStable LS Advanced is a scientifically advanced, extremely durable, robust and versatile transdermal cream base formulated with a silogel that provides a smooth, silky, dry feel upon application. Designed for all classes of active ingredients, irrespective of salt form, it exhibits superior API carrying capacity of multiple actives in one formulation. SaltStable LS Advanced demonstrates excellent emulsion stability without the need for added stabilizers.

- Increased stability with high percent of APIs and multiple actives
- Validated *in vitro* transdermal vehicle can contain up to 8 actives in one formula
- Less sticky and less tacky because of silogel (silicone based organogel) component
- Time saving - ready-to-use base, no need for added wetting agents or thickeners

API Load

High (~40%)

Compatible Solvents

Diethylene Glycol

Monoethyl Ether

Glycerin

Propanediol

Propylene Glycol

Ingredients

Purified water, mineral oil, cetareth-20, cetaryl alcohol, poloxamer 407, phenyl trimethicone, magnesium aluminum silicate, C30-45 alkyl cetaryl dimethicone crosspolymer, aloe barbadensis leaf extract, dimethicone, phenoxyethanol, hydroxyethyl acrylate/sodium acryloyldimethyl taurate copolymer, vitamin E acetate, propylene glycol, isopropyl palmitate, lecithin, diazolidinyl urea, ethylhexylglycerin, methylparaben, propylparaben

Specifications

SaltStable LS Advanced is an off-white heavy W/O cream emulsion

- pH: 7.1 – 7.5
- Specific Gravity: 0.9 g/mL
- Viscosity: 800,000 – 1,200,000 cps
