REWINDA

May 2025

The new Alemlube AR1020WPR Rewinda Weedicide, Chemical & Pesticide Hose Reel is an industrial quality hose storage and retrieval system that features a highly resistant PVC hose suitable for handling pest and weed chemicals.

This hose reel is suitable for use in environments where chemicals are widely used offering safe chemical management.

The Rewinda range has been researched, designed & engineered in conjunction with our long-standing, industry leading plastic covered hose reel partner, with the result being an exciting range of innovative, safe, ergonomic, durable and aesthetically pleasing hose reels.

Replacing the S Series as released in 2008, this new versatile & complete range meets market needs and is set to exceed industry expectations.

The patented speed rewind control system, included on all models, ensures that the hose retracts at a safe & steady speed, resulting in a safe operating environment, minimising the chance of damage to workshop equipment, and in some instances, customers' vehicles.

The unique, & also patented, stop-at-any-point latching system secures the hose at the exact desired length each and every time. The sliding guide system ensures that the hose returns neatly & evenly onto the barrel assembly, and the next level UV stabilised covers won't fade over time.

With a 10 year warranty on materials & workmanship and a no exclusions 2 year warranty on wearing parts such as o'rings, seals, hose assemblies, springs and bushes, the new Rewinda Series of hose reels is set to be the new on-point hose storage and retrieval solution in mining, construction, agriculture, transport and automotive sectors in Australia, New Zealand and Papua New Guinea.

SPECIFICATIONS, FEATURES & BENEFITS

- Pesticide, weedicide & chemical resistant PVC hose designed to handle acids & chemicals
- High grade impact resistant UV stabilised covers won't fade over time
- Patented speed rewind control system ensures that the hose retracts at a safe & steady speed with speed control brake system
- Patented stop-at-any-point latching system secures the hose at the exact desired length every time
- Sliding guide system ensures that the hose returns neatly & evenly on to the barrel assembly
- Detachable steel mounting bracket enables 180° hose reel rotation & fits other leading brands
- 20m x 10mm ID PVC hose with 0.9m lead in hose
- 1/4" BSPT(m) outlet & 3/8" BSPT(m) inlet connections
- 3/8" BSPT(f) hose reel inlet thread
- Maximum working pressure of 300psi (20 bar)
- Working temperature of 0°C to +60°C
- Weight of 12kg
