

PL-8369

POT FILLER

INSTALLATION INSTRUCTIONS

1. Wrap the thread on the pipe with the plumber's tape, then fix the pipe inside the wall. Fix the expansion screw into the wall and screw the base on the wall.
2. Attach the cover to the body, then install the faucet into the wall and tighten.
3. Fix the small screw in the base, fasten the tap and the connecting pipe, then adjust the cover to the base.
4. Remove the areator, turn on the water, then flush the faucet and check for leaks. If ok, turn off the water and install the areator.
