HANDMADE RUGS

UNDERLAY FOR RUGS

The right underlay can make a big difference in both comfort and function. We offer two different sizes of underlays: a thin and a thick version, so the rug does not slip.

- **Thin underlays are best for**
 - Rugs that are already thick or heavy
 - Situations where a lower-cost solution is needed
 - Under dining tables, where a firmer surface is preferred
- **Thick underlays are best for**
 - Thin or lightweight rugs that might slip
 - Uneven floors
 - When comfort and insulation are important (both sound and heat)
 - High-quality or luxury rugs

How to install a large rug underlay

1. Clean and make sure the floor is dry
2. Place the rug where you want it and fold it in half
3. Fold the underlay and place it under the empty space
4. Flip the folded half of the rug back over the underlay
5. Repeat on the other side
6. Smooth out wrinkles by hand, working in small sections

Tip: Underlays are easy to cut with scissors. Cut them so they are 5 cm smaller than the rug on all sides.
